Redwood Road

Multimodal Transportation Study

A Partnership Project

- Participants include

- Salt Lake City
- Salt Lake County
- Sandy City
- South Jordan City
- Taylorsville City
- West Jordan City
- West Valley City

- Prepared by

- Jacobs
- Avenue Consultants
- Jacques & Associates
- Leland Consulting Group

Coordinated by

Purpose and Scope

- Redwood Road is one of few North South multimodal connections in the SL Valley
- Study evaluates Redwood Road from 1700 North in Salt Lake City to 11400 South in South Jordan
- Recommendations focus on land use, roadway, transit, bicycle and walkability along the Redwood Corridor
- Concurrent with UDOT's Salt Lake County West Side Bicycle Connectivity Study

Study Process

- Existing Conditions analysis built on a review of 32 existing studies from 9 entities ranging from 2010 to present to review
- Market Analysis (Land Use connection)
- Needs assessed in five focus areas
- Conceptual alternatives created, charrette hosted
- Screening and comparison of alternatives
- Preferred alternative proposed
- Implementation plan created
- Scope (city by city)
- Timeline (1-5, 5-15 and 15+ time horizons identified based on potential TIP, STIP and other funding)
- Potential funding sources identified for each project

Recommendations - Transit

- Core Route Transit Service (similar to BRT)
- 18 stations
- Signal priority at 9 lights
- 8 queue jumps
- 17 mile route Runs from Downtown SLC to South Jordan Parkway

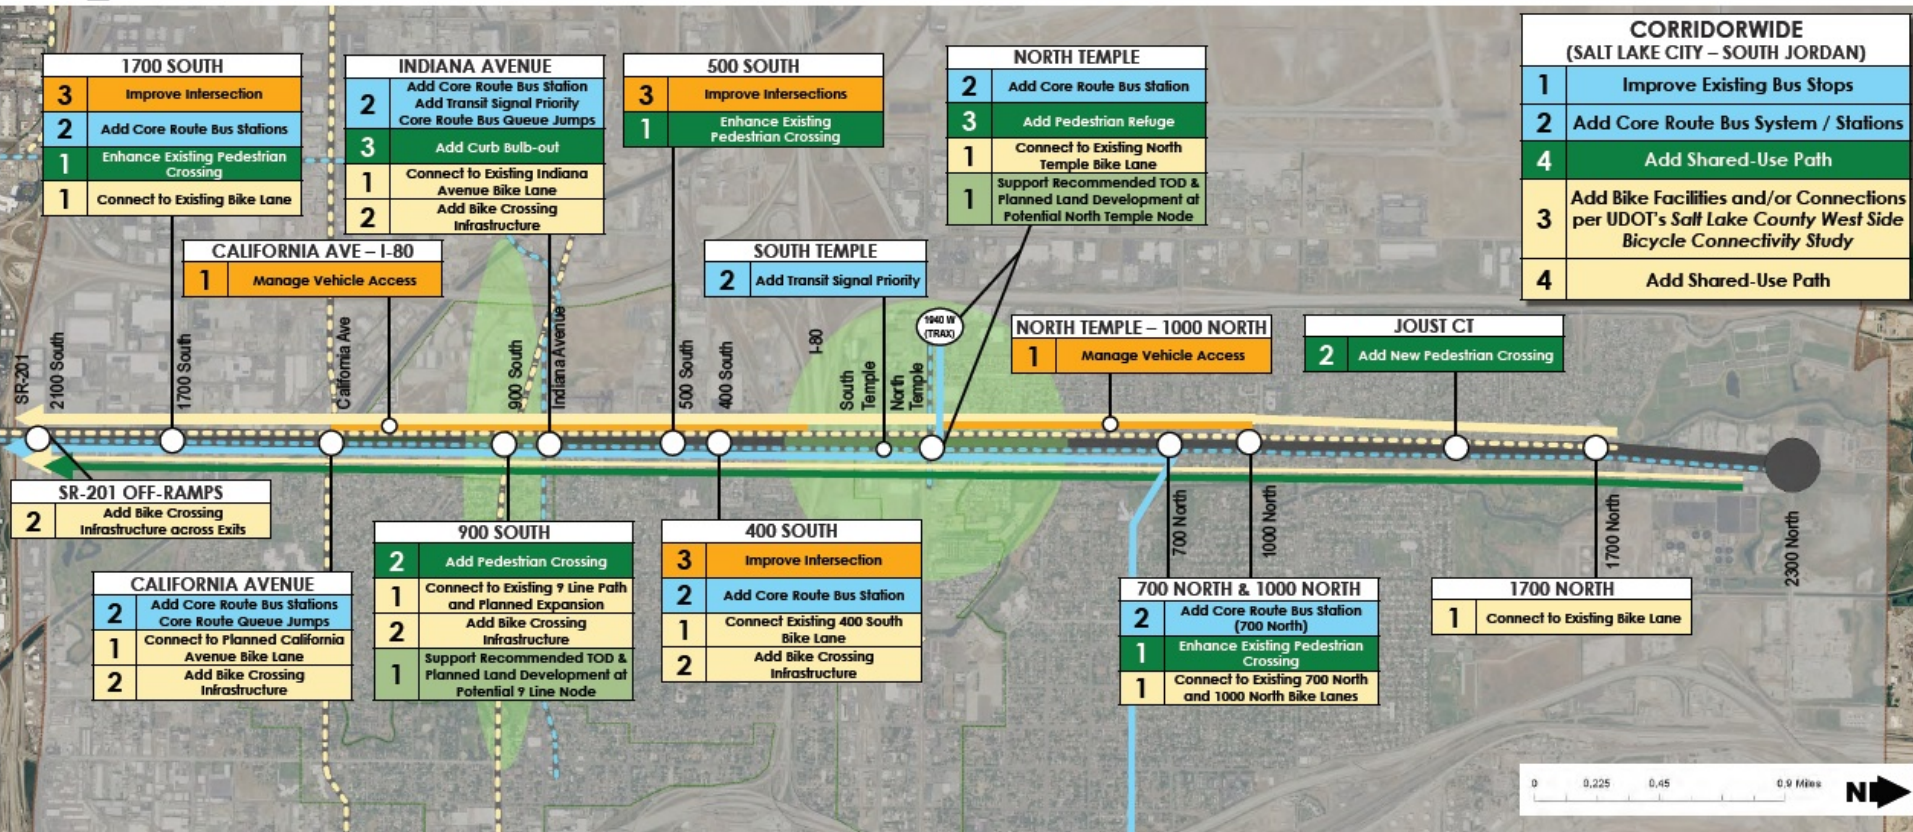

Recommendations - Bicycle

- Improved crossing on SR-201 off ramps
- Connections to existing bike facilities
- Shared Use path
- Buffered bike lane on 1300 W (south of SLC)

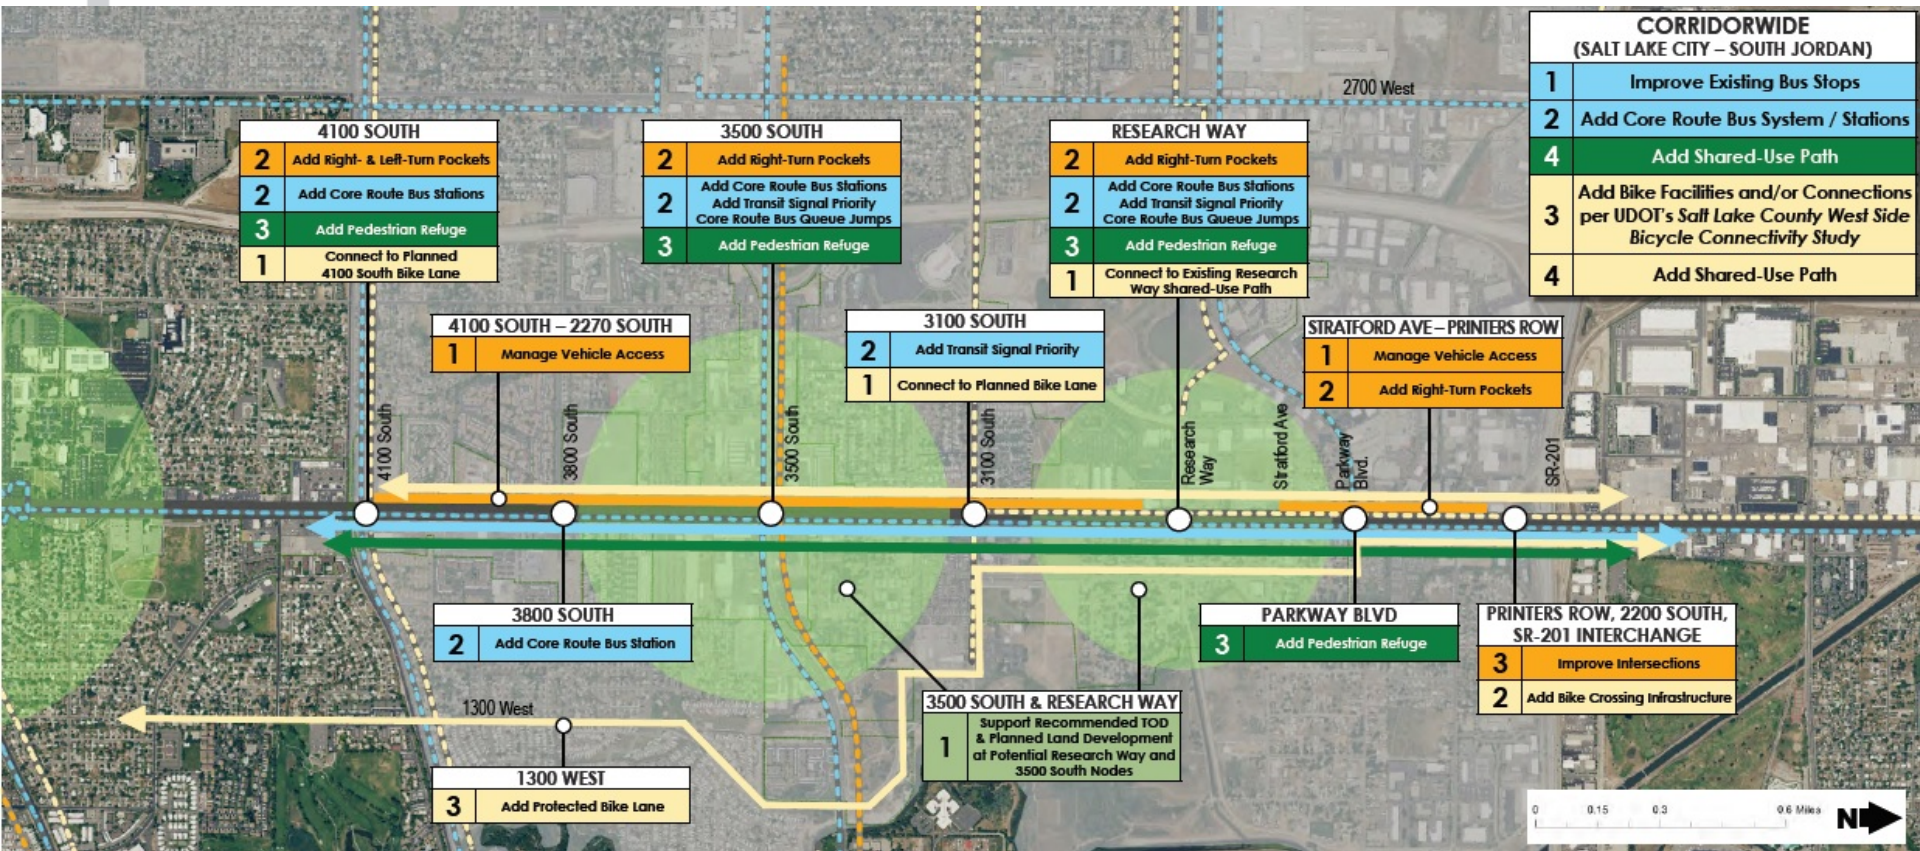

Recommendations - Walkability

- Enhanced Crossings
- Bulb Outs
- Pedestrian Refuges
- Signalized Crossings
- Mid Block Crossings
- Shared Use Path

Recommendations – Salt Lake City

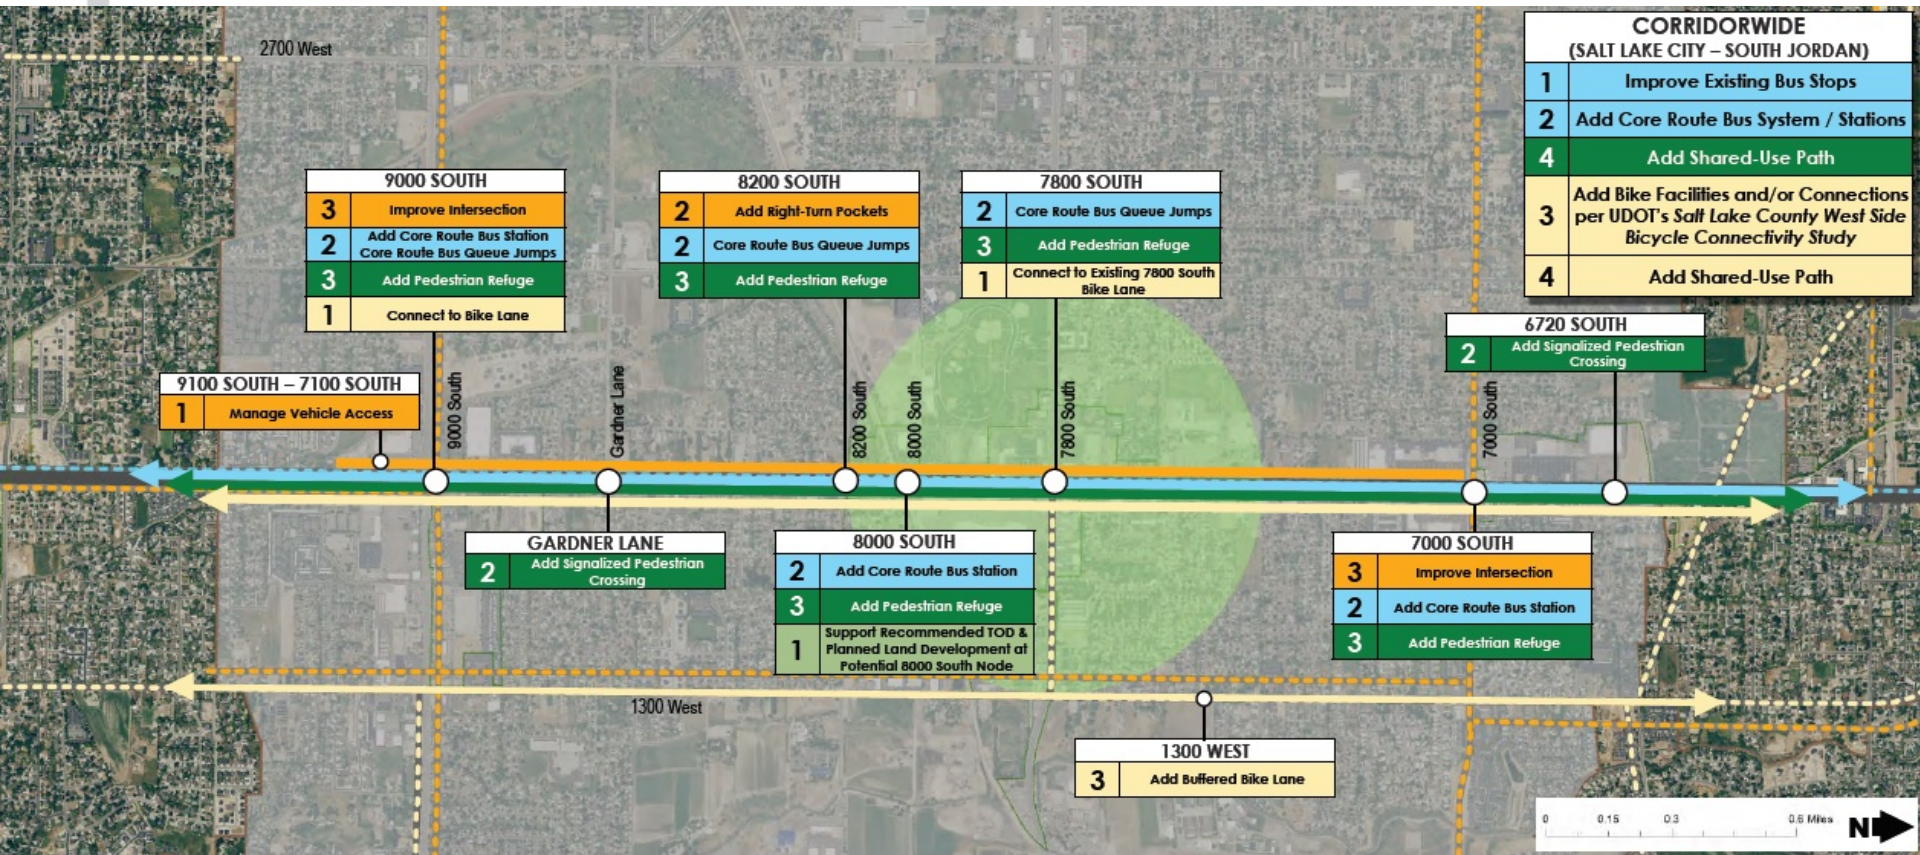

Recommendations – West Valley

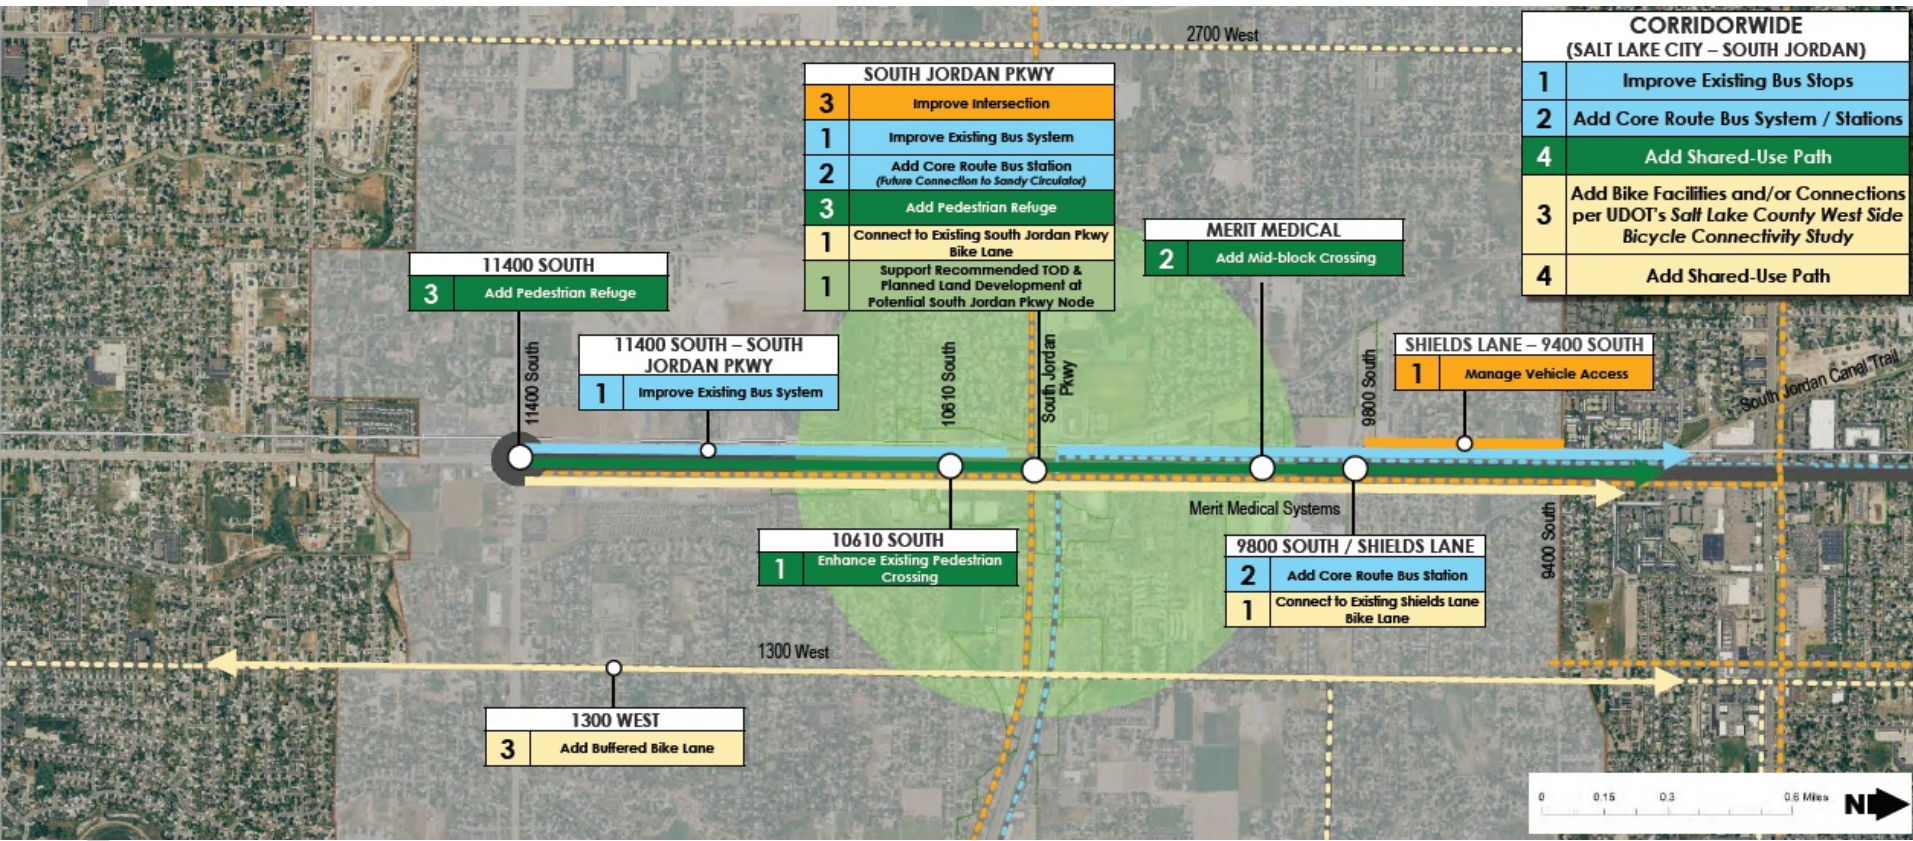

Recommendations - Taylorsville

Recommendations – West Jordan

Recommendations – South Jordan
