

Street (Poor Design) Series Introduction

Streets have a major affect on the feel of a community. Streets should be rich with smart design that helps communities to be safe, scenic and livable and that offer smooth routes for all transportation modes. This series includes photos of several types of poor street design and maintenance. While viewing these photos you may choose to consider how the following keywords apply to each photo. Then, consider how these keywords may apply to similar, present and future streets within your community.

Keywords:

automobile dominated, chaotic intersections, high traffic speeds, lack of pedestrian facilities, lacks bicyclist or pedestrian awareness, lacks bike lanes, lacks crosswalks, lacks curb and gutter, lacks pedestrian buffers, lacks sidewalks, poor maintenance, poor signage display, poor streetscape design, poor traffic calming, poor visibility
