

# STATEWIDE MPOs ROADWAY GRID STUDY UPDATE

April 2025

# STUDY PURPOSE & GOALS

STATEWIDE MPOS REGIONAL  
ROADWAY GRID STUDY

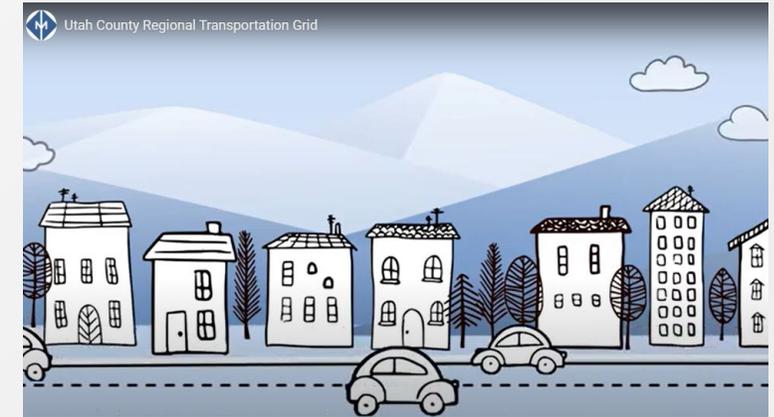

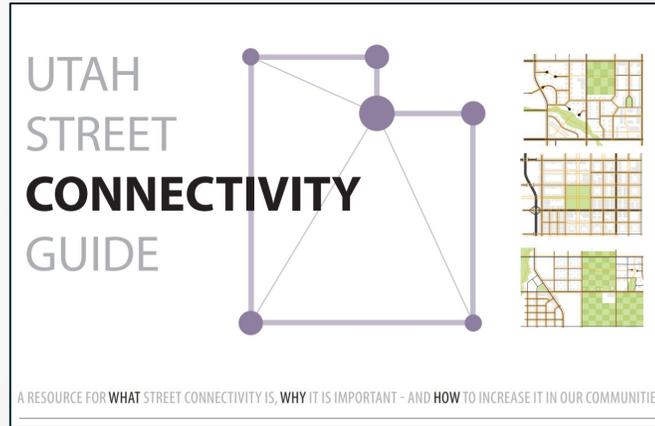

# STUDY PURPOSE

- Initiated by legislative directive (2023 SB2)
- Co-led by Utah MPOs (MAG, WFRC, Cache, Dixie) in collaboration with UDOT and transit providers
- Charged with designing an optimal, prioritized, and feasible grid network for each MPO region
  - Including opportunities for a more complete grid to enhance transit and active transportation
  - Promising projects from this effort will be considered for inclusion in each MPO's RTP process

# GRID NETWORK BENEFITS

Building on prior research and studies to **identify new, regionally significant connections and projects** to improve mobility for all four of Utah's MPO regions

STATEWIDE MPOs REGIONAL ROADWAY GRID STUDY

<p>CONNECTIVITY IMPROVES <b>MOBILITY</b></p>	<p>CONNECTIVITY CREATES <b>TRANSPORTATION CHOICE</b></p>	<p>CONNECTIVITY IMPROVES <b>EMERGENCY SERVICE</b></p>	<p>CONNECTIVITY IMPROVES <b>SAFETY</b></p>	<p>CONNECTIVITY IMPROVES <b>THE ECONOMY</b></p>
--	--	---	--	---

# STUDY GOALS

## ASSESS CONNECTIVITY & GRID FUNCTION

We will assess how each of our MPO regions perform as a regional grid network for all modes, and where connectivity challenges exist now and in the future.

## DEVELOP SOLUTIONS

Develop, test, and prioritize new and improved connections that help each region's network function better and realize grid network benefits.

## PREPARE TO IMPLEMENT

Provide localities and agencies with a toolbox to formalize recommendations in plans and pursue implementation, including cost estimates and funding / ownership options.

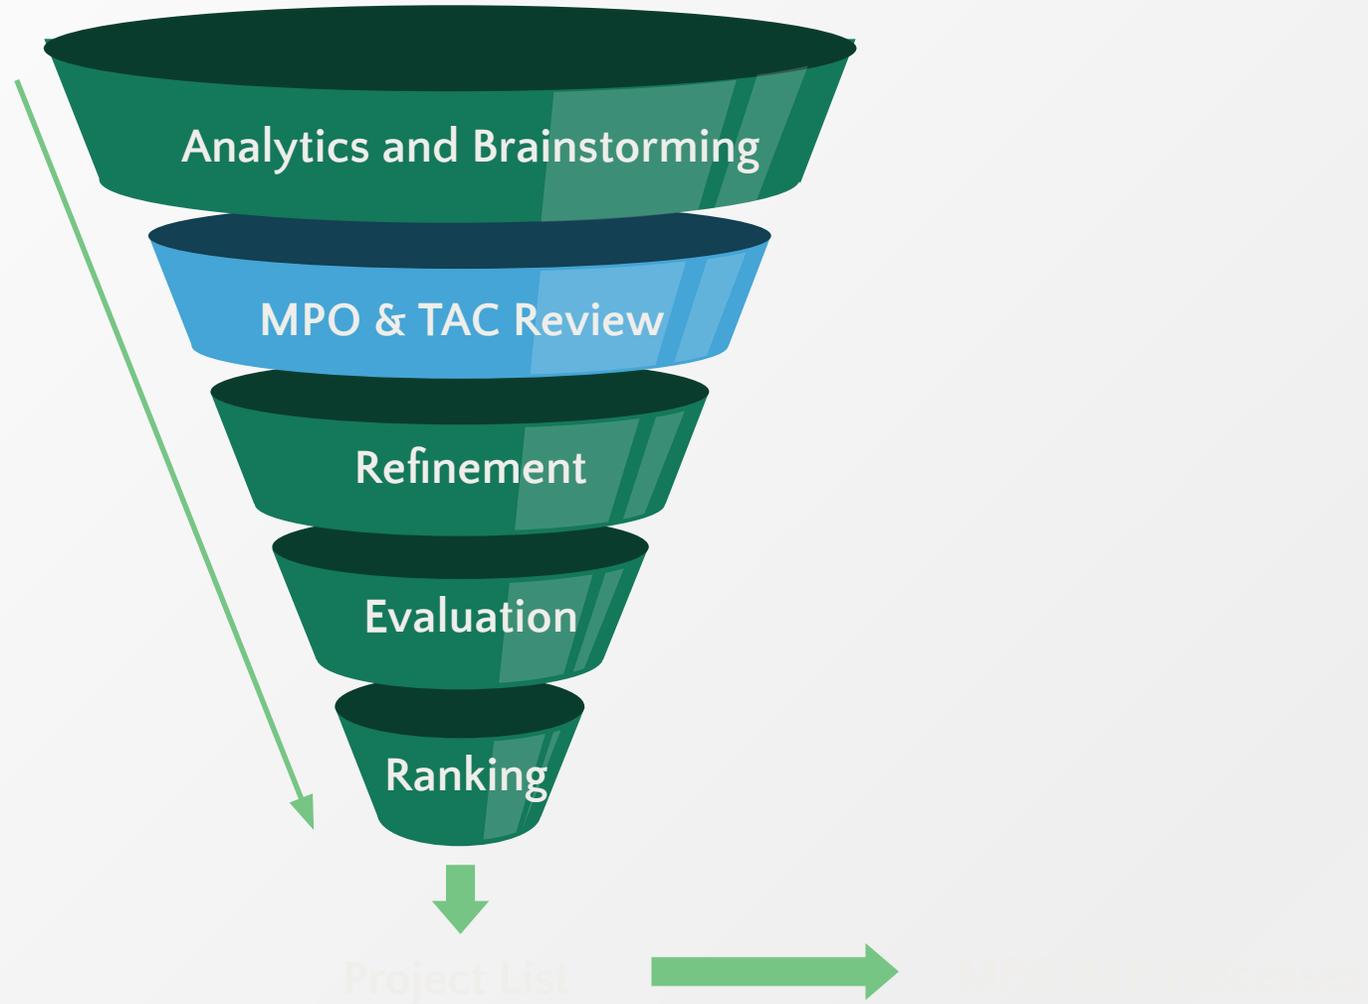

# PROJECT DEVELOPMENT

STATEWIDE MPOS REGIONAL  
ROADWAY GRID STUDY

# PROJECT DEVELOPMENT ROADMAP

STATEWIDE MPOS REGIONAL  
ROADWAY GRID STUDY

# NETWORK ANALYSIS & METRICS

## ACCESSIBILITY

*How well can people access desired destinations across the network via different modes?*

## EFFICIENCY

*Does the network use scarce resources (space, time, money) effectively to achieve transportation outcomes?*

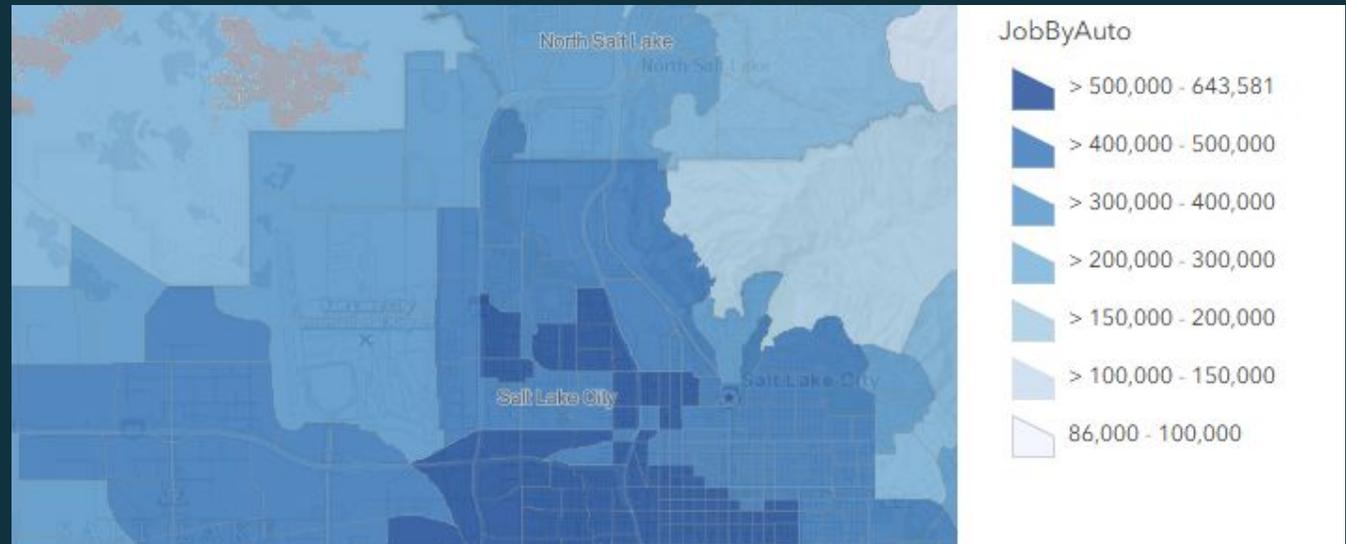

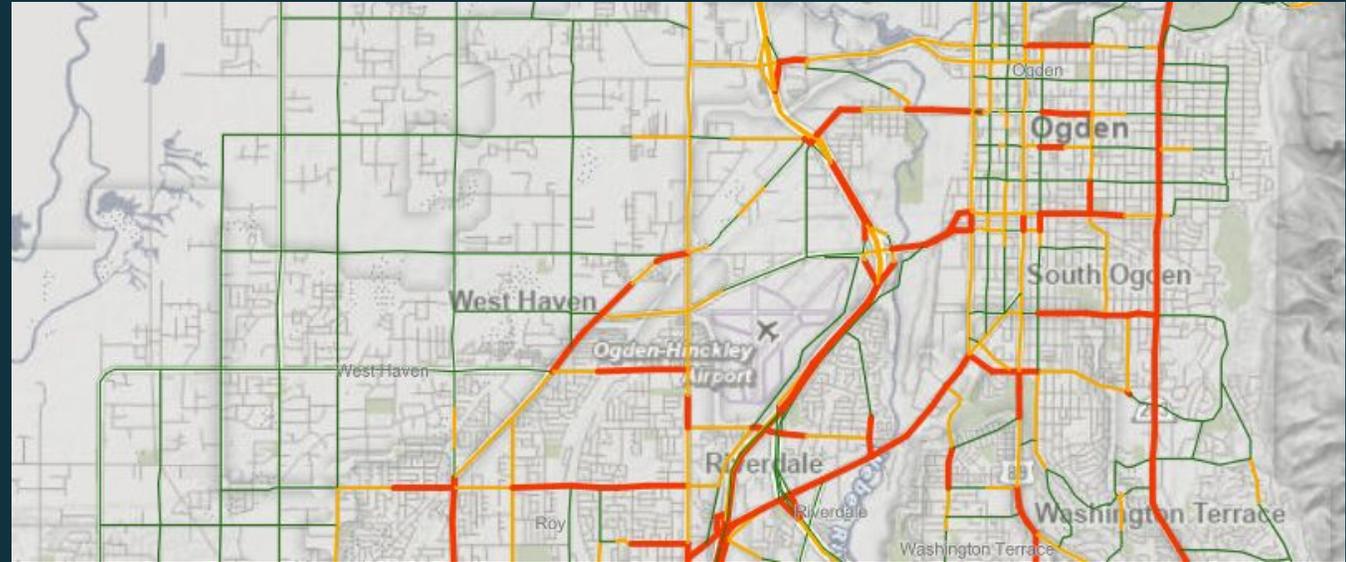

## RESILIENCY

*How well can the network function across changing conditions?*

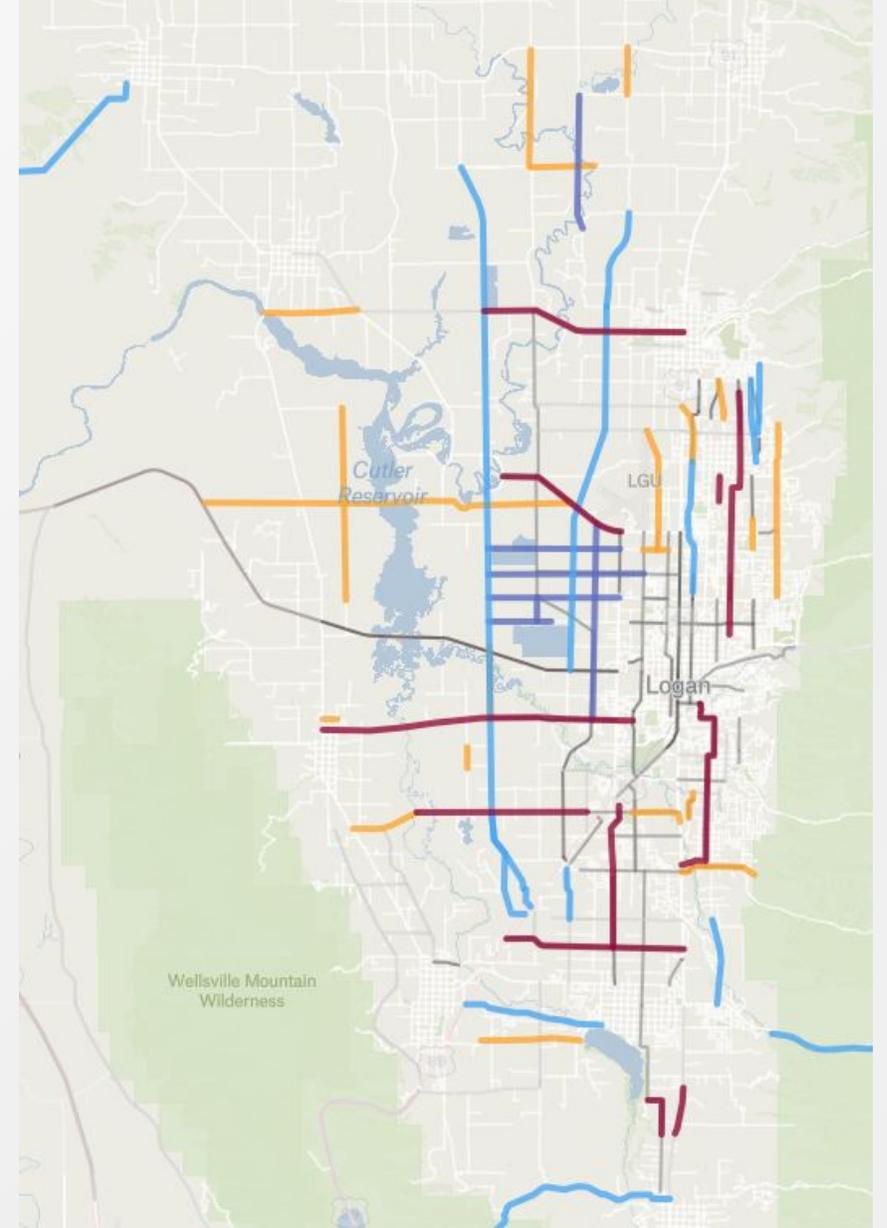

## FAIR ACCESS

*How much does connectivity vary across geography and income groups?*

# PROJECT CONCEPTS

- “A to B” Connections with alignments yet to be determined, driven by mobility needs and opportunities
- Based on regional data, agency workshops and comments, and project team brainstorming
- High-level concepts for addressing missing links, backbone networks for growth areas, regional connections, and key capacity improvements

# WE NEED YOUR FEEDBACK

STATEWIDE MPOS REGIONAL  
ROADWAY GRID STUDY

Some of these projects may be **challenging or controversial**

Our charge from the legislature is to **explore what works best** for the overall transportation grid – not just what's easiest

Expect **rough concepts** – some may be advanced as shown, others may need major revisions or be eliminated

**Your professional expertise and local knowledge** is key to moving the best concepts forward

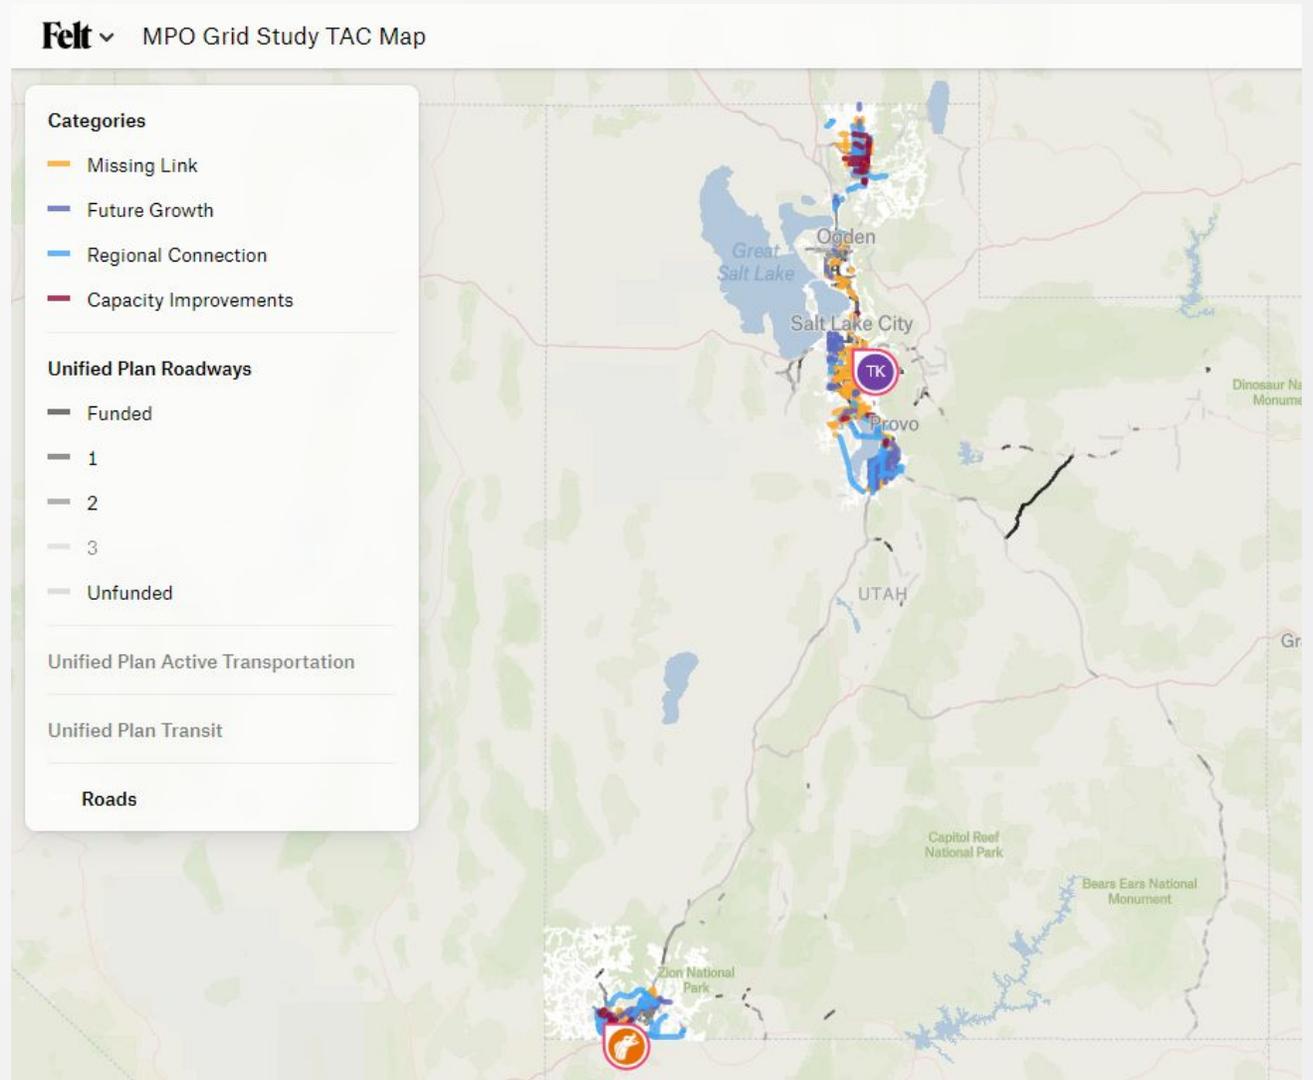

Projects that emerge from this study may be vetted and prioritized through the **RTP process**

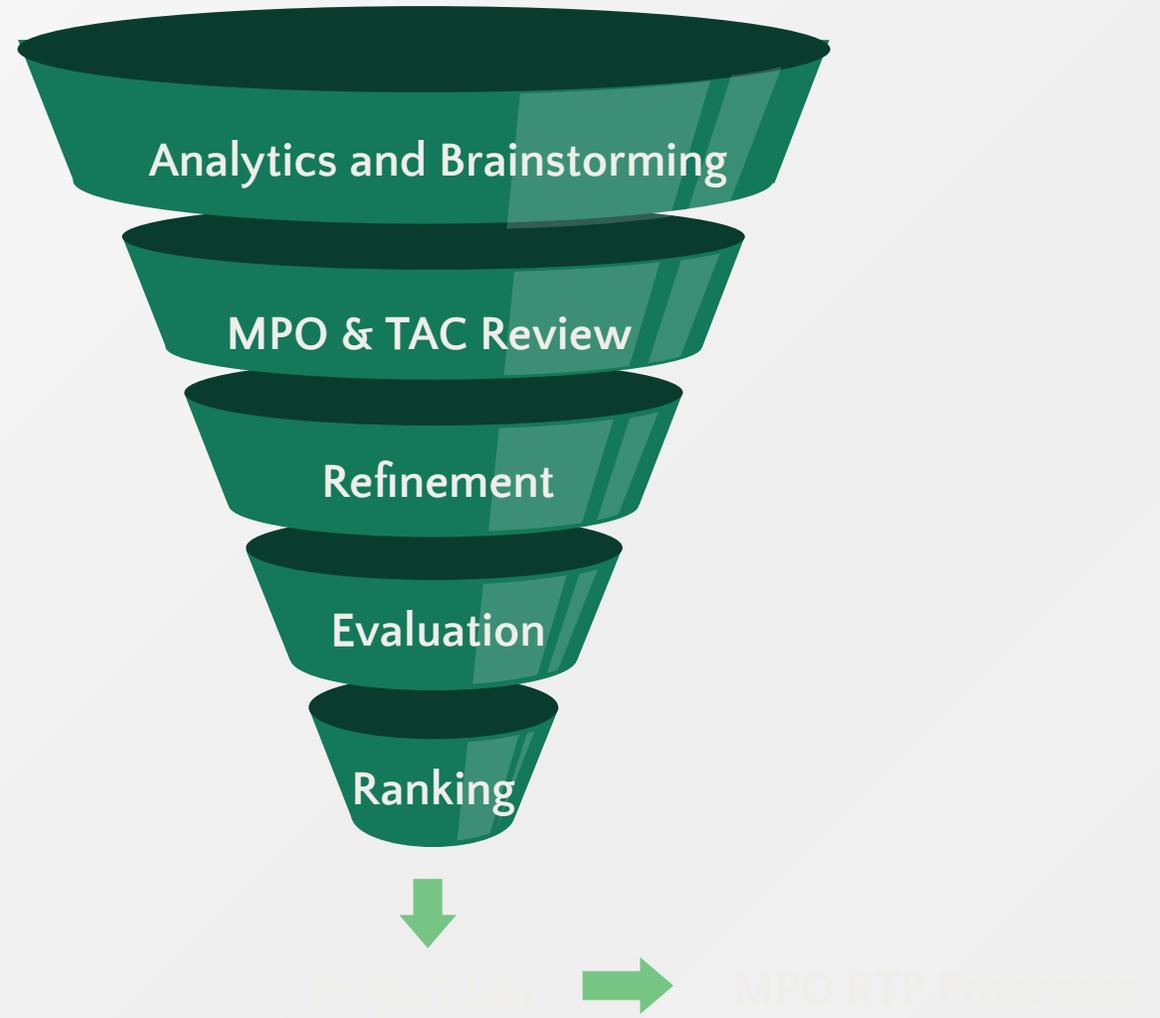

# HOW YOU CAN HELP

- Share concerns, past planning efforts, or community context
  - Are there **fatal flaws or major concerns** with these concepts?
  - Has a **similar concept been studied or proposed before** in your area?
  - Do you have **suggestions for refinements** or alternative alignments?
- We want to understand the good, the bad, and the ugly for each concept
- Call out when a project is difficult, but also potentially beneficial or transformative

# NEXT STEPS

- Refine projects based on your input
- Screen against evaluation criteria to identify tiered lists of concepts
- Additional outreach and updates through TACs
- Develop concept sheets and cost estimates for most promising projects

# QUESTIONS?

STATEWIDE MPOS REGIONAL  
ROADWAY GRID STUDY

# **ITEM 4** | Transportation & Land Use Connection 2025 Awards

---

Matt Ryan, Community Planner

RGC Technical Advisory Committee , April 16, 2025

**WFRRC**

# What is “TLC?”

Planning technical assistance program linking:

**LAND USE + TRANSPORTATION + ECONOMIC DEVELOPMENT**

- Maximize the value of **investment in public infrastructure.**
- Enhance **access to opportunities.**
- **Increase travel options to optimize mobility.**
- Create communities with **opportunities to live, work, and play.**

Governor's Office of  
**Planning and Budget**
