3. I-15 Project Update - Project Team

Mike Romero of UDOT reported on progress of the I-15 project EIS from Farmington to SLC. Oldest pavement on I-15 Wasatch Front with deteriorating structures. Travel time will increase from 18 minutes today to 55 minutes in 2050 if improvements are not made. SPUIs and other interchange designs are difficult for pedestrians. Several alternatives for cross sections and interchange configurations were considered. Final EIS should be ready Spring 2024.

4. Transportation Improvement Program (TIP) Business - Ben Wuthrich

- o **Action** – Board Modification - Gentile Street - Safe Routes to School project 3475 W to 3200 W, in Layton is requesting additional funds. This project will create a uniform cross section of roadway including curb, gutter, and sidewalk. This project will remove the need for students and other pedestrians to walk in the roadway. The project cost increases are primarily due to the increase of building materials and labor, the necessity of temporary construction easements, and right of way needs. The project was originally estimated at \$162K but due to the cost increases the new estimated project cost is \$450K. Layton City requests an additional \$245K in STP funds.
