

# Station Area Plan Technical Assistance PROJECT SELECTION CRITERIA

Category	Description
<i>Pertinant to SAP Requirements of HB462</i>	Persuant to HB462, this project must fulfill all or some of the SAP statutory requirements, help to prepare the city to do so, or implement the station area plan in some way
<i>Qualified Land Use Application</i>	<a href="#"><u>City states that a "qualified land use application" (per HB462) has been received for that station, application receives priority consideration. 10-9a-403.1 (1) (g)</u></a>
<i>Station Area Challenges and Opportunities</i>	Do the opportunities and challenges faced by the station area indicate a pressing need for station area planning?
<i>Start Date</i>	These funds are intended for projects that can start quickly, projects will receive points depending on readiness to start
<i>Regional Collaboration</i>	Projects where more than one community are involved will score more points in this category, however applying with additional local governments is not required
<i>Local Match by Population (no minimum match)</i>	<i>Note, local match is not required for this program.</i> The applicant's percentage of local funds committed towards the total project cost. Percentage is based on jurisdictional size. <b>(Match:Total Project Cost)</b>

## Additional Considerations

- 1 award per municipality until each applicant has received technical assistance, then municipalities are eligible for more than 1 award
- regional equity; equitable distribution geographically
- whether the project helps to fulfill requirements for multiple stations
