WHAT WE’RE DOING

Transportation agencies are kicking off a study of Southwest Salt Lake County to develop potential solutions for transportation infrastructure, in consideration of land use plans. This builds on the previous Southwest Salt Lake County Vision effort, in which the majority of concerns expressed related to transportation. The project will:

- **A** Understand past and current policy decisions, plans, growth rates, and patterns
- **B** Identify transportation hot spots and potential solutions
- **C** Analyze potential future scenarios, which includes the link between land use patterns and transportation infrastructure

WHAT TO EXPECT IN THIS PROJECT

- A deeper analysis into local & regional transportation needs & opportunities
- Engaging, & involved participation at scheduled meetings
- The development of solutions addressing roadways, transit, & active transportation opportunities

WHY WE’RE DOING IT THIS WAY

- INCREASING GROWTH & TRAFFIC CONGESTION
- THE COMMUNITY’S NEEDS ARE CHANGING
- DEVELOPMENT IS HAPPENING AT A RAPID PACE
- INNOVATIVE TRANSPORTATION TECHNOLOGIES HITTING THE MARKET (Rideshares, autonomous transit, etc.)

THE PROCESS

1. Confirm & summarize existing conditions
2. Review the previous work (regional and county transportation plans, city master plans, etc.)
3. Identify issues & develop potential solutions
4. Analyze a variety of future scenarios based on the issues and potential solutions
5. Make recommendations
