**Safety Summary**

**Tech Memo #1 Safety Analysis**

**Case Study Project Information Sheets**

**Case Study Project Location Map**

**Equity Index Map**

# **EASTERN WEBER COUNTY & MORGAN COUNTY SAFETY SUMMARY**

## CSAP OVERVIEW

*“A plan to provide local governments the means to make strategic roadway safety improvements”*

Wasatch Front Regional Council (WFRC) is preparing a regional Comprehensive Safety Action Plan (CSAP). The CSAP will present a **holistic, well-defined strategy to reduce roadway fatalities and serious injuries** in the Wasatch Front region.

The CSAP will **analyze** safety needs, **identify** high-risk locations and factors contributing to crashes, and **prioritize** strategies to address them.

The CSAP will meet eligibility requirements that allow local jurisdictions to apply for **Implementation Grants** from the United States Department of Transportation (USDOT) Safe Streets and Roads for All (SS4A) discretionary grant program. The grant program was established by the Bipartisan Infrastructure Law (BIL) with \$5 billion in appropriated funds, 2022-2026. A Safety Action Plan must include the following elements, as specified by FHWA to satisfy eligibility requirements to apply for an implementation grant:

**State Route:** Roadways owned, operated, and maintained by UDOT

**Federal-Aid Route:** Non-UDOT roadways eligible for federal funding – typically minor arterials and collectors

**Local Streets:** Other non-UDOT / non-Federal Aid roadways, primarily collectors, and residential streets

## Self-Certification Checklist

**Plan must include the following:**

**Safety Analysis**

- Existing conditions and historical trends
- Crashes by location, severity, and contributing factor
- Systemic and specific safety needs
- Geospatial identification of higher risk locations

**Identification of comprehensive set of projects and strategies**

**...And must complete 4 of the 6 elements to the right:**

- |   |  |
|---|--|
| <p>1. <b>Leadership Commitment</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Governing body publicly commit to a zero fatalities and serious injury goal</li> </ul> | <p>4. <b>Equity</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Data-driven, inclusive, and representative processes</li> </ul>  |
| <p>2. <b>Plan Development</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Committee charged with plan development, implementation, and monitoring</li> </ul>          | <p>5. <b>Policies, Plans, Guidelines, and/or Standards</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Assessment policies, plans, guidelines, and/or standards</li> </ul> |
| <p>3. <b>Development Activities</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Engagement with public and relevant stakeholders</li> </ul>                           | <p>6. <b>Progress</b></p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Description on how progress will be measured over time</li> </ul>  |

## Safe System Approach

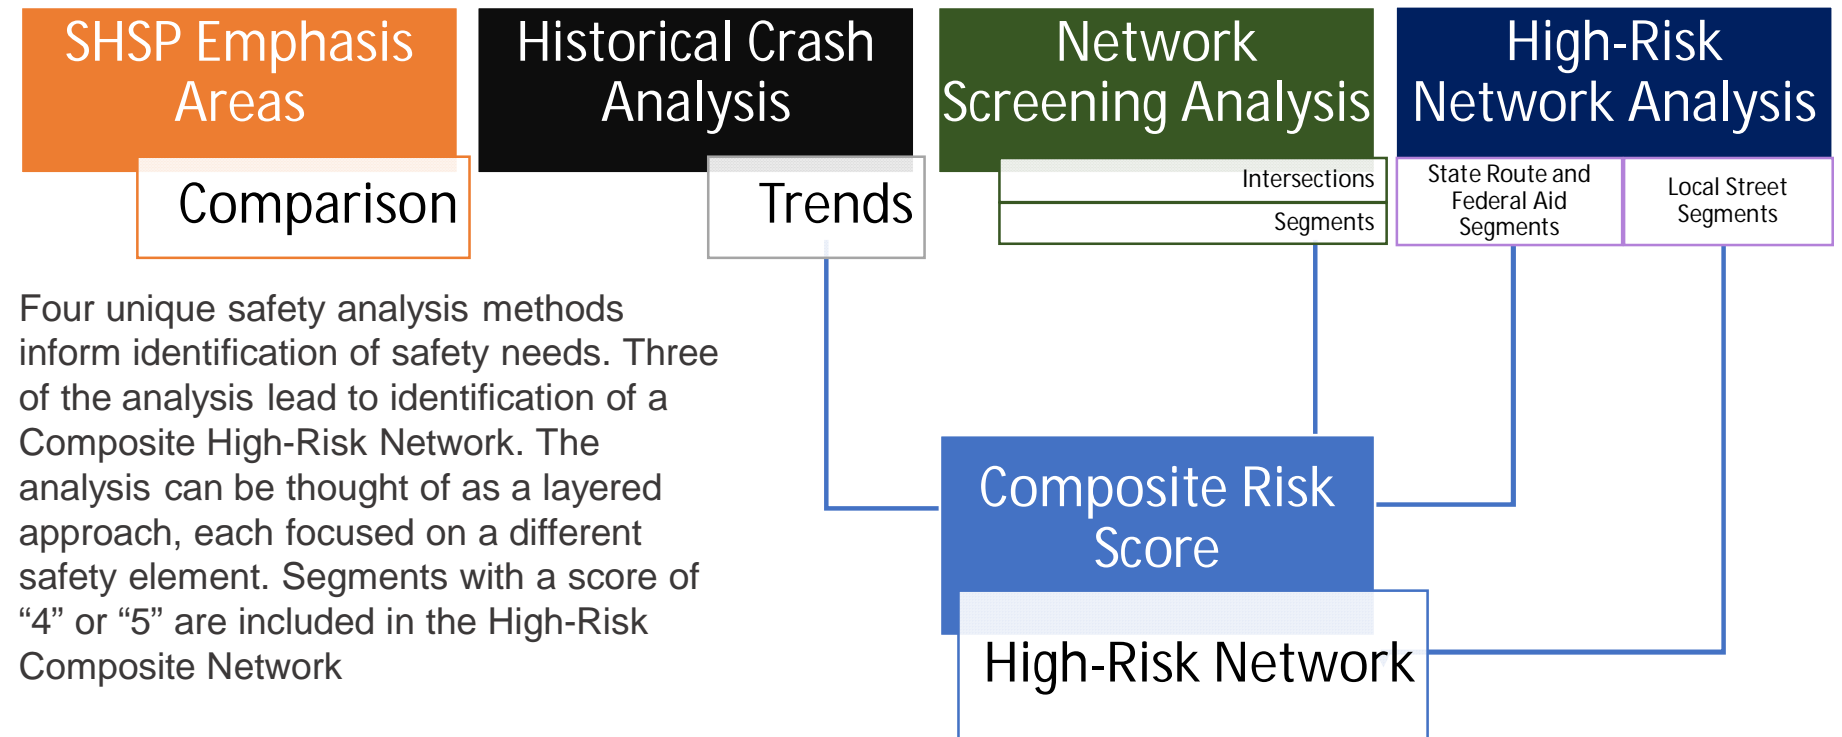

*Implementing a Safe System Approach requires moving away from traditional safety paradigms.*

- ❑ The Safe System approach seeks to prevent death and serious injuries.
- ❑ The Safe System approach designs for human mistakes and limitations.
- ❑ The Safe System approach focuses on speed management and strategies to reduce system kinetic energy.
- ❑ The Safe System approach aims to share responsibility among system users, managers, and others.
- ❑ The Safe System approach proactively identifies and addresses risks

Traditional Approach to Safety	Safe System Approach Paradigm
Prevent crashes	Prevent death and serious injury
Improve human behavior	Design for human mistakes/limitations
Control speeding	Reduce system kinetic energy
Individuals are responsible	Share responsibility
React based on crash history	Proactively identify and address risks

## Safety Analysis Methodology

Four unique safety analysis methods inform identification of safety needs. Three of the analysis lead to identification of a Composite High-Risk Network. The analysis can be thought of as a layered approach, each focused on a different safety element. Segments with a score of “4” or “5” are included in the High-Risk Composite Network

Analysis	Composite High Risk Score Element	Value
Historical Crash Analysis	Segment 5-Year Crash Totals $\geq$ 3 Crashes	1
Network Screening Analysis	Positive CCR Differential	1
High-Risk Network Analysis	Crash Profile Risk Score $\geq$ 20	1
	usRAP Vehicle Star Rating = 1-2 Stars	1
	usRAP Pedestrian Star Rating = 1-2 Stars	0.5
	usRAP Bicycle Star Rating = 1-2 Stars	0.5
<b>Total Possible Composite Risk Score</b>		<b>5</b>

## Strategic Highway Safety Plan (SHSP) Emphasis Area Comparison

Based on a comparison of fatal and serious injuries for each Utah SHSP Emphasis area, the following emphasis areas should be considered when developing safety improvement projects specific to the **East Weber County & Morgan County GFA**.

- Roadway Departure
- Motorcycle
- Speed-Related
- No Safety Restraints
- Teen Driver

Note that while Intersection and Roadway Departure emphasis areas rank highest in terms of number of fatal and serious injuries at the Statewide and Regional Levels, Roadway Departure and Motorcycles rank highest in the **East Weber County & Morgan County GFA**.

Motorcycles ranks 7<sup>th</sup> as a Statewide and 5<sup>th</sup> Regional emphasis area, and 2<sup>nd</sup> in the **East Weber County & Morgan County GFA**.

## Strategic Highway Safety Plan Emphasis Area Comparison

Category	Utah SHSP Safety Emphasis Area	Statewide Totals		WFRC Totals		East Weber County & Morgan County Totals		
		Fatal and Serious Injury	Rank	Fatal and Serious Injury	Rank	Fatal and Serious Injury	Rank	Change in Rank From WFRC
Driver	Teen Driver	1,640	4	751	4	15	5	-1
	Older Driver	1,508	6	700	6	8	8	-2
	Speed-Related	2,133	3	936	3	34	3	0
	Aggressive Driving	555	11	297	10	12	6	4
	Distracted Driving	718	10	286	11	5	10	1
	Impaired Driving	1,184	8	623	8	10	7	1
	No Safety Restraints	1,542	5	599	9	23	4	5
Roadway	Intersection	3,567	1	2,163	1	8	8	-7
	Roadway Departure	2,931	2	1,014	2	65	1	1
Special Users	Motorcycle	1,457	7	750	5	42	2	3
	Pedestrian	912	9	636	7	0	12	-5
	Bicycle*	280	12	167	12	1	11	1

\*While Bicycles are not one of the eleven Utah SHSP emphasis areas, they are included as part of the CSAP safety analysis.

## 5-Year Historical Crash Trends in East Weber County and Morgan County GFA

Route Type	State Route		Federal Aid Route		Local Street		Overall Total		% of WFRC
Crash Severity	Crashes		Crashes		Crashes		Crashes		%
	#	%	#	%	#	%	#	%	
Fatal	21	1%	1	0%	2	2%	<b>24</b>	<b>1.2%</b>	<b>0.0%</b>
Suspected Serious Injury	45	3%	12	4%	6	5%	<b>63</b>	<b>3.2%</b>	<b>0.0%</b>
Suspected Minor Injury	183	12%	36	13%	14	12%	<b>233</b>	<b>12.0%</b>	<b>0.1%</b>
Possible Injury	171	11%	42	15%	9	8%	<b>222</b>	<b>11.4%</b>	<b>0.1%</b>
No Injury / Property Damage Only	1,125	73%	183	67%	89	74%	<b>1,397</b>	<b>72.0%</b>	<b>0.8%</b>
<b>Route Total</b>	<b>1,545</b>	<b>100%</b>	<b>274</b>	<b>100%</b>	<b>120</b>	<b>100%</b>	<b>1,939</b>	<b>100%</b>	<b>1.1%</b>

## Composite High-Risk Roadway Network

Each of the completed safety analysis methodologies identified segments or intersections that are **candidates for safety improvements** to reduce fatalities and serious injury crashes.

To provide focused information for jurisdictional decisions regarding **prioritization of safety improvements**, an analysis was performed to identify overlapping segments from each of the analysis methodologies. A **composite risk score**, from zero to five, was assigned to each State Highway or Federal Aid Route segment in the region. State Route or Federal Aid Route segments with a score of “4” or higher are included in the Composite High-Risk Network. These represent the top 10% of State Route and Federal Aid Route segments for the entire WFRC area.

The Composite High Risk Network map on page 8 includes State Route and Federal Aid Route segments with a score of “4” or higher.

A list of locally-owned and maintained Federal Aid Route segments in the **East Weber County & Morgan County** GFA Composite High-Risk Network is included on the next page. Streets operated and maintained by local agencies are an emphasis of the SS4A program.

Analysis	Composite High Risk Score Element	Value
Historical Crash Analysis	Segment 5-Year Crash Totals $\geq$ 3 Crashes	1
Network Screening Analysis	Positive Local CCR Differential	1
High Risk Network Analysis	Crash Profile Risk Score $\geq$ 20	1
	usRAP Vehicle Star Rating = 1-2 Stars	1
	usRAP Pedestrian Star Rating = 1-2 Stars	0.5
	usRAP Bicycle Star Rating = 1-2 Stars	0.5
<b>Total Possible Composite Risk Score</b>		<b>5</b>

State Route and Federal Aid segments in the **East Weber County & Morgan County GFA** Composite High-Risk Network are listed at left. Each of these segments received a composite risk score of “4” or higher. These segments provide a focus for local jurisdictions or for coordination with UDOT. Each of these segments are shown on the map on page 7.

Local Streets are also listed at left. These segments were identified through a separate analysis that considered factors such as crash location, proximity to schools, and hard braking.

## Network Screening - Intersections

Network Screening is one of the inputs to the Composite High-Risk Network. Network screening is based on Critical Crash Rate Differential analysis as documented in the Highway Safety Manual. This analysis identified intersections where historical crash rates exceed those which can be expected for similar facilities.

A list of the top-10 intersections on State Routes, Federal Aid Routes, and Local (Non-Federal Aid) Streets in the **East Weber County and Morgan County** GFA are listed at right, along with their associated number of crashes.

For each intersection, the Critical Crash Rate (CCR) Differential and Equivalent Property Damage Only (EDPO) value is listed. These intersections represent those with the highest potential for safety improvements and can be considered as project candidate locations.

Signalized and unsignalized intersections in the **East Weber County and Morgan County** GFA with a positive Critical Crash Rate Differential (rate exceeds expected rate) are mapped on page 9.

Intersection	City	Crashes	Critical Crash Rate Differential	EPDO <sup>1</sup>	Fatal	Suspected Serious Injury	Suspected Minor Injury	Possible Injury	No Injury/PDO	Angle	Front to Rear	Head On	Parked Vehicle	Single Vehicle	Rear to Rear	Rear to Side	Sideswipe (Same Direction)	Sideswipe (opposite Direction)	Other/Unknown	Pedestrian	Bicycle	Motorcycle

## 1. Introduction

**Appendix A4** summarizes the safety analysis performed for the East Weber County & Morgan County Geographic Focus Area (GFA) for the Wasatch Front Area Comprehensive Safety Action Plan (CSAP).

The analysis of available safety related data informs identification of a potential project locations that may be further considered in the development of safety related projects and project types.

### 1.1. Safety Analysis

The following safety analysis methodologies were completed for the East Weber County & Morgan County GFA:

- Strategic Highway Safety Plan (SHSP) Emphasis Area Analysis
- Historical Crash Analysis
- Crash and Network Screening Analysis
- Roadway Characteristic Risk Analysis
  - Crash Profile Risk Assessment
  - usRAP Risk Factors Analysis
  - Local Street Risk Assessment

An overview on the methodologies used to perform these safety analyses are described in Technical Memorandum #1: Safety Analysis Results Summary. **Appendix A4** summarizes the results of the analyses for the East Weber County & Morgan County GFA.

### 1.2. Appendix Organization

This Appendix is organized into the following sections:

- **Section 1** - Introduction
- **Section 2** - East Weber County & Morgan County GFA Study Area and Roadway Network.
- **Section 3** - Strategic Highway Safety Plan (SHSP) Emphasis Area Analysis.
- **Section 4** - Historical Crash Analysis
- **Section 5** - Crash and Network Screening Analysis based on Highway Safety Manual (HSM).
- **Section 6** - Roadway Characteristic Risk Analysis
- **Section 7** - Common Risk Characteristics and Composite High-Risk Roadway Network

## 2. Study Area

The CSAP study area includes each jurisdiction within the WFRC area. To organize the large number of jurisdictions within the WFRC area into manageable analysis areas, jurisdictions are organized into Geographic Focus Areas (GFA). The East Weber County & Morgan County GFA (**Figure 2.1**) is located within Weber and Morgan Counties and includes the following agencies and jurisdictions:

- Morgan
- Huntsville

The safety analyses presented in this Technical Memorandum are specific to the East Weber County & Morgan County GFA.

**Figure 2.2** highlights the roadway network within the South Box Elder & North Weber Counties GFA study area. Roadways within the study area are divided into the following three categories:

- State Routes: UDOT-maintained roads.
- Federal Aid Routes: Jurisdiction-maintained roads eligible for federal funding.
- Local Streets: Local Jurisdiction-maintained roads that are not Federal Aid routes.

**NOTE ON CRASH DATA ANALYSIS:** All crash data presented in this Technical Memorandum are specific to the East Weber County & Morgan County GFA, for the years 2018-2022. Crash data was obtained from the Utah Department of Transportation.

Figure 2.1 – East Weber County & Morgan County GFA Study Area

Figure 2.2 – East Weber County & Morgan County GFA Roadway Network

### 3. SHSP Emphasis Area Analysis

The SHSP emphasis area analysis ranks the frequency of fatal and serious injury crashes in the East Weber County & Morgan County GFA for each of the eleven Utah SHSP emphasis areas. The rankings of the emphasis areas are compared for the East Weber County & Morgan County GFA, statewide (all public roads statewide), and the WFRC study area totals. Each reported crash can have more than one emphasis area identified. The results of the SHSP emphasis area analysis are displayed in **Table 3.1**. The top five ranked emphasis areas are highlighted in the table with the top five for the East Weber County & Morgan County GFA are listed below:

- Roadway Departure
- Motorcycle
- Speed Related
- No Safety Restraints
- Teen Driver

**Table 3.1 – SHSP Emphasis Areas Analysis**

Category	Utah SHSP Safety Emphasis Area	Statewide Totals		WFRC Totals		East Weber County & Morgan County Totals		
		Fatal and Serious Injury	Rank	Fatal and Serious Injury	Rank	Fatal and Serious Injury	Rank	Change in Rank From WFRC
Driver	Teen Driver	1,640	4	751	4	15	5	-1
	Older Driver	1,508	6	700	6	8	8	-2
	Speed-Related	2,133	3	936	3	34	3	0
	Aggressive Driving	555	11	297	10	12	6	4
	Distracted Driving	718	10	286	11	5	10	1
	Impaired Driving	1,184	8	623	8	10	7	1
	No Safety Restraints	1,542	5	599	9	23	4	5
Roadway	Intersection	3,567	1	2,163	1	8	8	-7
	Roadway Departure	2,931	2	1,014	2	65	1	1
Special Users	Motorcycle	1,457	7	750	5	42	2	3
	Pedestrian	912	9	636	7	0	12	-5
	Bicycle*	280	12	167	12	1	11	1

\*While Bicycles are not one of the eleven Utah SHSP emphasis areas, they are included as part of the CSAP safety analysis.

## 4. Historical Crash Analysis

A historical crash data analysis was conducted for the most recent complete 5-year period from 2018 to 2022. This historical crash analysis is primarily focused on fatal and serious injury crashes.

### 4.1. Overall Crashes

**Table 4.1** provides an overview of overall crashes by severity and roadway ownership within the East Weber County & Morgan County GFA. The data shows the following:

- State Routes recorded 80% of the total crashes in this GFA
- Federal Aid routes recorded 14% of fatal and serious injury crashes in this GFA
- Local Streets (non-Federal Aid) recorded 6% of fatal and serious injury crashes in this GFA

**Table 4.1 – Crashes by Severity by Roadway Ownership**

Route Type	State Route		Federal Aid Route		Local Street		Overall Total		% of WFRC
Crash Severity	Crashes		Crashes		Crashes		Crashes		%
	#	%	#	%	#	%	#	%	
Fatal	21	1%	1	0%	2	2%	<b>24</b>	<b>1.2%</b>	<b>0.0%</b>
Suspected Serious Injury	45	3%	12	4%	6	5%	<b>63</b>	<b>3.2%</b>	<b>0.0%</b>
Suspected Minor Injury	183	12%	36	13%	14	12%	<b>233</b>	<b>12.0%</b>	<b>0.1%</b>
Possible Injury	171	11%	42	15%	9	8%	<b>222</b>	<b>11.4%</b>	<b>0.1%</b>
No Injury / Property Damage Only	1,125	73%	183	67%	89	74%	<b>1,397</b>	<b>72.0%</b>	<b>0.8%</b>
<b>Route Total</b>	<b>1,545</b>	<b>100%</b>	<b>274</b>	<b>100%</b>	<b>120</b>	<b>100%</b>	<b>1,939</b>	<b>100%</b>	<b>1.1%</b>

### 4.2. Fatal and Serious Injury Crashes by Year

**Figure 4.1** through **Figure 4.5** provide an overview of fatal and serious injury crashes by year and roadway ownership for the East Weber County & Morgan County GFA. The data shows the following:

- Fatal and serious injury crashes significantly increased in 2020 and 2021; in 2022, they decreased to similar numbers as occurred in 2018
- Year 2020 recorded highest number of serious crashes during the 5-year period (2018 – 2022); year 2021 was similar
- Serious injury crashes followed a similar pattern as fatal crashes
- Most (21 of 24) of the fatal crashes occurred on state routes

### 4.3. Fatal and Serious Injury Crashes by Location

**Error! Reference source not found.** shows the locations of the fatal and serious injury crashes within the East Weber County & Morgan County GFA. Crashes are largely focused on State Routes.

**Error! Reference source not found.** is a density map of fatal and serious injury crashes within the East Weber County & Morgan County GFA.

Figure 4.1 – Fatal and Serious Injury Crashes by Year

Figure 4.2 – Fatal Crashes by Year

**Figure 4.3 – Annual Fatal Crashes by Roadway Ownership**

**Figure 4.4 – Serious Injury Crashes by Year**

Figure 4.5 – Annual Serious Injury Crashes by Roadway Ownership

Figure 4.6 – Fatal and Serious Injury Crashes

Figure 4.7 – Fatal and Serious Injury Crash Density

#### 4.4. Fatal and Serious Injury Crashes by Crash Type

Figure 4.8 through Figure 4.10 provide an overview of fatal and serious injury crashes by crash type and roadway ownership for the East Weber County & Morgan County GFA. The data shows the following:

- Roadway departure crash type has the highest number of total fatal and serious injuries with 53 crashes
- Most (50 of 53) Roadway Departure crashes are on State Routes
- Motorcycle-involved and rural highway cross-over are other occurring crash types

Figure 4.8 – Fatal and Serious Injury Crashes by Crash Type

**Figure 4.9 – Fatal Crashes by Crash Type and Roadway Ownership**

**Figure 4.10 – Serious Injury Crashes by Crash Type and Roadway Ownership**

#### 4.5. Fatal and Serious Injury Vulnerable User Crashes

Figure 4.11 through Figure 4.13 provide an overview of fatal and serious injury crashes by vulnerable road user and roadway ownership for the East Weber County & Morgan County GFA. The data shows the following:

- There were no pedestrian crashes in this GFA.
- There was only one bicycle crash in this GFA (serious injury)
- There were 38 motorcycle-involved crashes, 9 of which were fatal

Figure 4.11 – Fatal and Serious Injury Crashes by Vulnerable User

**Figure 4.12 – Fatal Crashes by Vulnerable User and Roadway Ownership**

**Figure 4.13 – Serious Injury Crashes by Vulnerable User and Roadway Ownership**

#### 4.6. Fatal and Serious Injury Crashes by Manner of Collision

Figure 4.14 through Figure 4.16 provide an overview of fatal and serious injury crashes by manner of collision and roadway ownership for the East Weber County & Morgan County GFA. The data shows the following:

- Single vehicle and angle crash types resulted in the largest number of fatal and serious injury crashes in this GFA
- No other crash types exceeded five fatal crashes

Figure 4.14 – Fatal and Serious Injury Crashes by Manner of Collision

**Figure 4.15 – Fatal Crashes by Manner of Collision and Roadway Ownership**

**Figure 4.16 – Serious Injury Crashes by Manner of Collision and Roadway Ownership**

#### 4.7. Fatal and Serious Injury Intersection Crashes

Figure 4.17 through Figure 4.19 provide an overview of fatal and serious injury crashes by intersection and roadway ownership for the East Weber County & Morgan County GFA. The data shows the following:

- Most fatal and serious injury crashes were not intersection related
- There were 8 intersection-related crashes

Figure 4.17 – Fatal and Serious Injury Crashes by Intersection

**Figure 4.18 – Fatal Crashes by Intersection and Roadway Ownership**

**Figure 4.19 – Serious Injury Crashes by Intersection and Roadway Ownership**

#### 4.8. Fatal and Serious Injury Crashes by Functional Class

Figure 4.20 through Figure 4.22 provide an overview of fatal and serious injury crashes by functional class and roadway ownership for the East Weber County & Morgan County GFA. The data shows the following:

- Most fatal and serious injury crashes occurred on minor arterials and collectors; eight fatal and serious injury crashes occurred on Local Streets

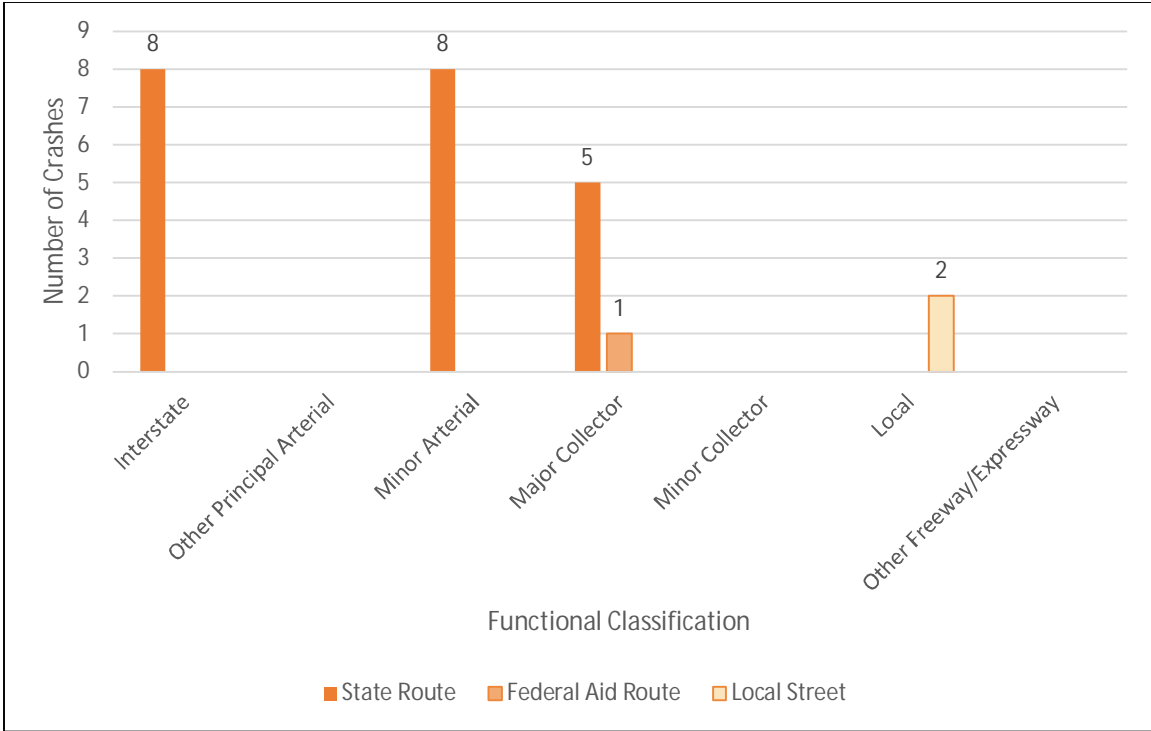

Figure 4.20 – Fatal and Serious Injury Crashes by Functional Class

**Figure 4.21 – Fatal Injury Crashes by Functional Class and Roadway Ownership**

**Figure 4.22 – Serious Injury Crashes by Functional Class and Roadway Ownership**

#### 4.9. Fatal and Serious Injury Crash Trees Diagrams

Fatal and serious injury crash tree diagrams were generated for the East Weber County & Morgan County GFA. These crash tree diagrams are presented in **Figure 4.23** and **Figure 4.24**.

The crash trees are limited to the top 3 categories for crash type and manner of collision. Each crash tree diagram displays the total fatal and serious injury crashes (T), fatal crashes (K), and serious injury crashes (A). The data shows the following:

- State Routes recorded the highest number of crashes
- Most crashes are in rural areas in this GFA
- Urban areas recorded a higher number of crashes than rural area
- Roadway Department represents the most prominent crash type

**CRASH TYPE**

Figure 4.23 – Fatal and Serious Injury Crash Tree Diagram (Crash Type)

MANNER OF COLLISION

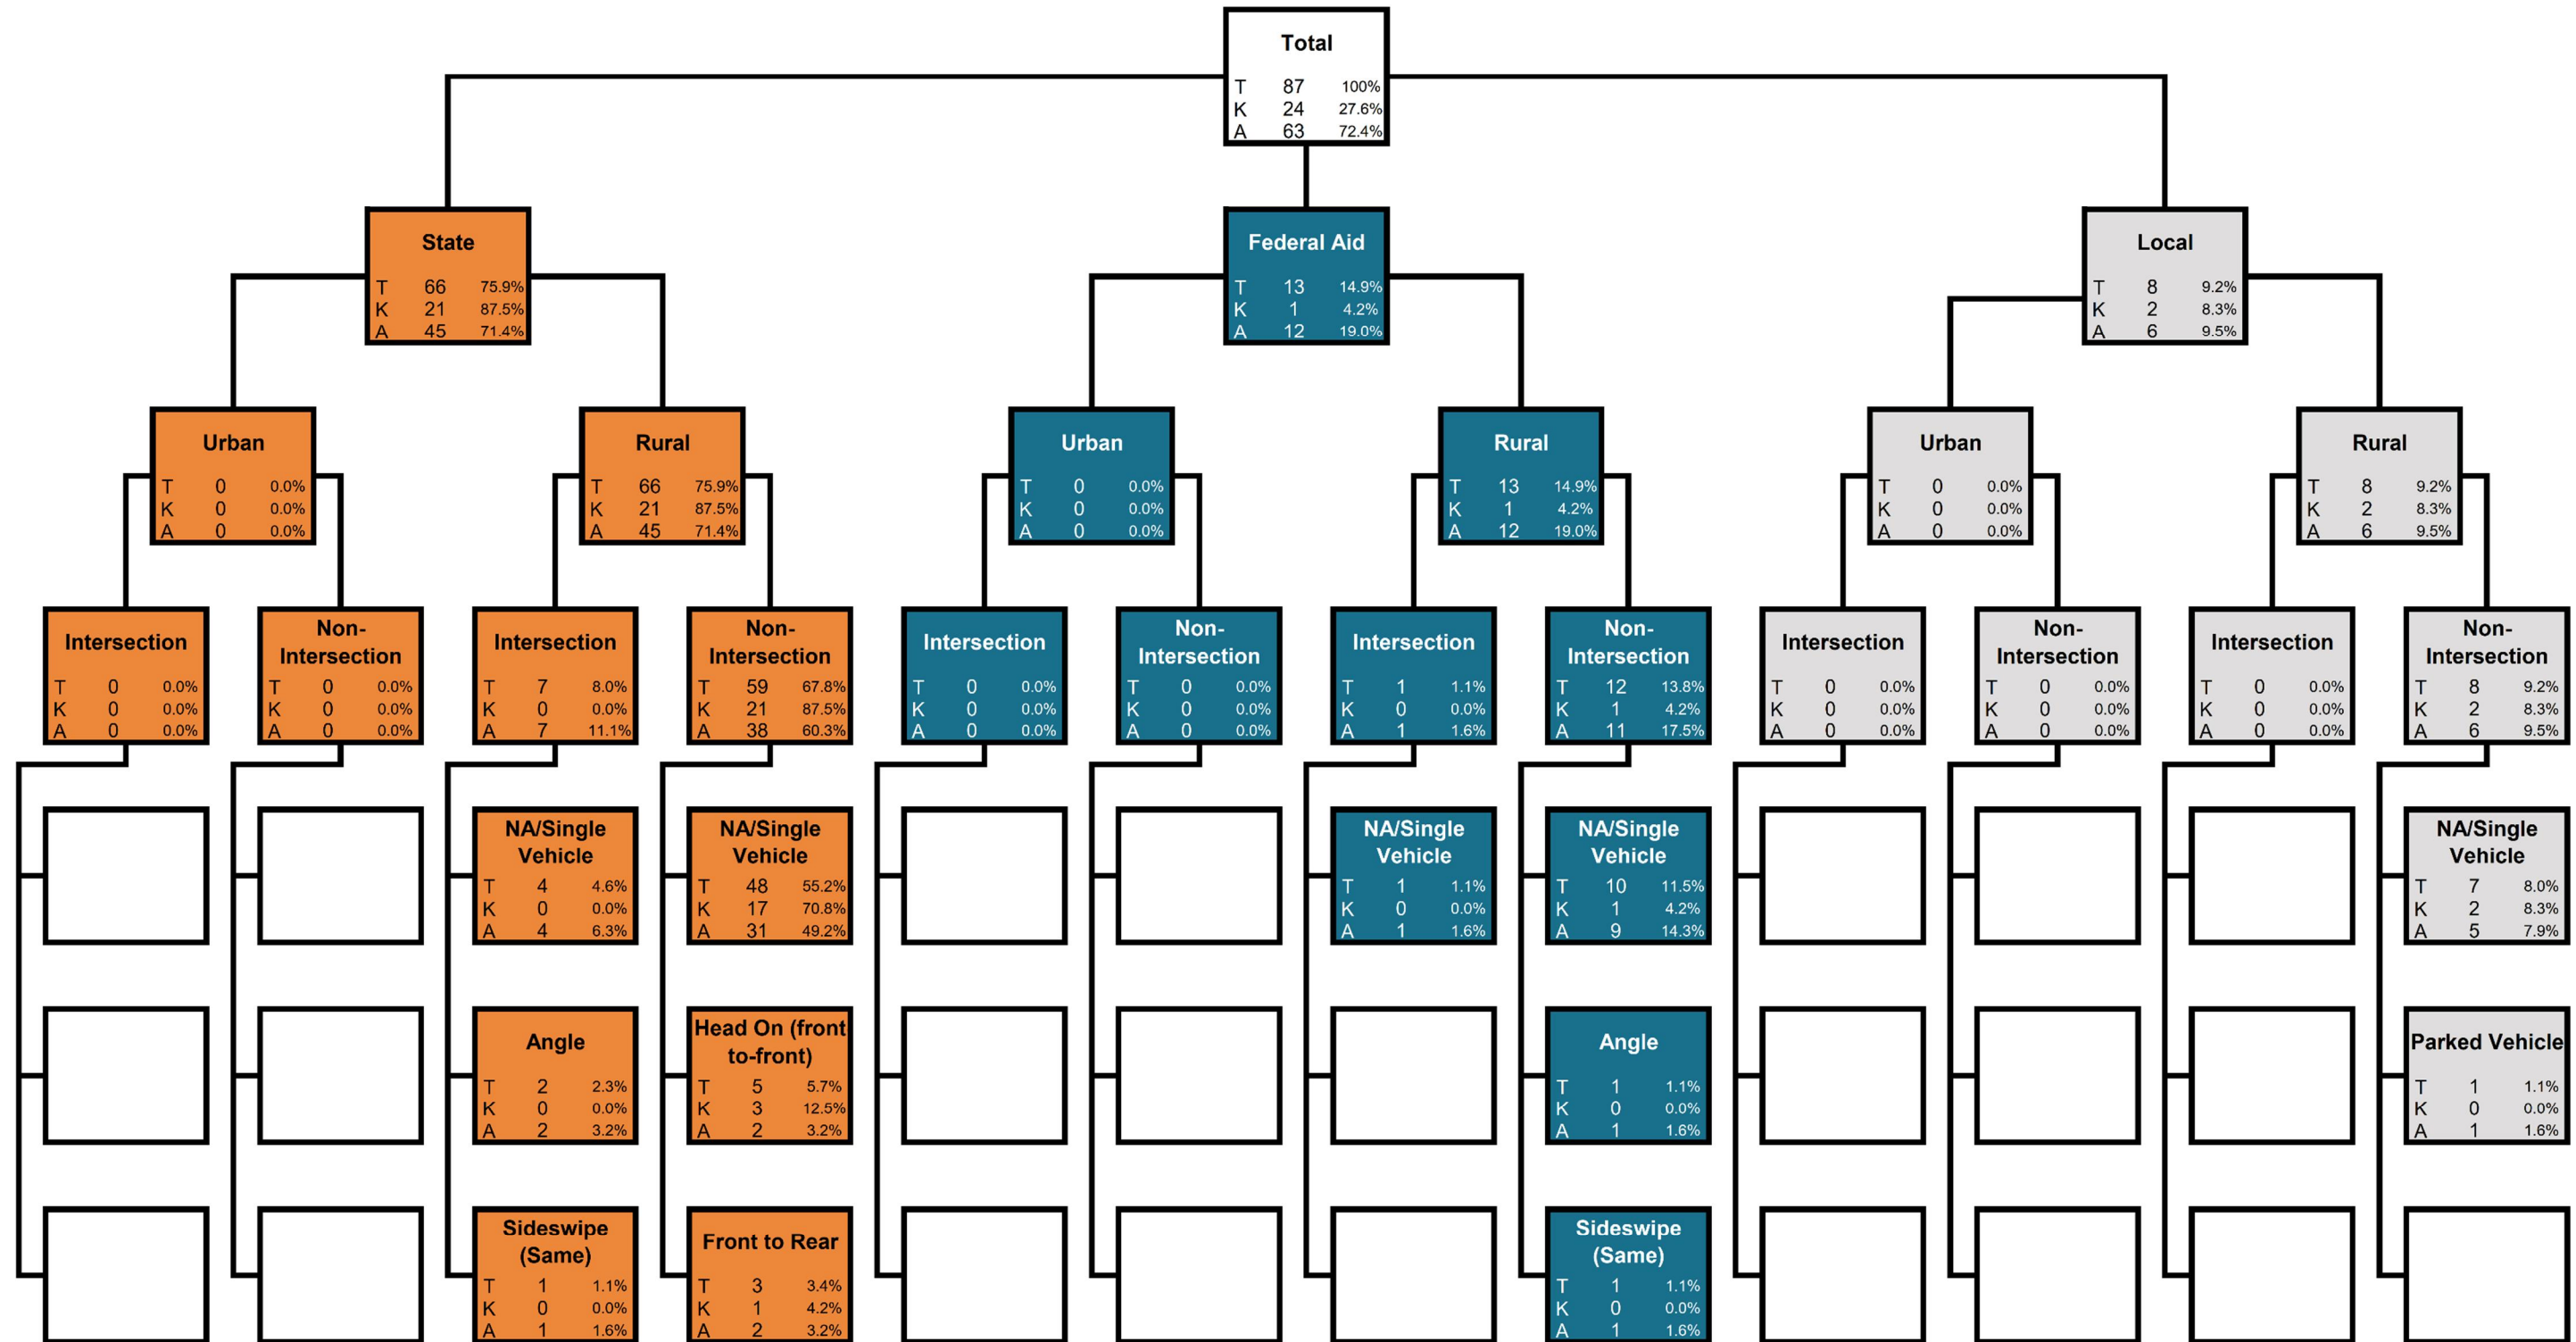

Figure 4.24 – Fatal and Serious Injury Crash Tree Diagram (Manner of Collision)

## 5. Crash and Network Screening Analysis

A crash and network screening analysis was prepared for the East Weber County & Morgan County GFA informed by four sub-analyses:

- Number of Crashes
- Critical Crash Rate (CCR)
- Probability of a Specific Crash Type Exceeding Threshold Proportion
- Equivalent Property Damage Only (EPDO)

CCR Differential by roadway ownership are mapped in the following figures:

- **Figure 5.1** – CCR Differential – Segments (State Routes)
- **Figure 5.2** – CCR Differential – Segments (Federal Aid Routes)
- **Figure 5.3** – CCR Differential – Segments (Local Routes)
- **Figure 5.4** – CCR Differential – Intersections (Signalized)
- **Figure 5.5** – CCR Differential – Intersections (Unsignalized)

A positive Local CCR Differential is an indication of a location with a potential for safety improvement (PSI).

A list of the top 10 CCR Differential segments and intersections for the East Weber County & Morgan County GFA are located in **Table 5.1** and **Table 5.2** along with their associated number of crashes, probability of a specific crash type exceeding threshold proportion, and EPDO analysis results.

These locations represent those with the highest potential for safety improvements and can be considered as project candidate locations.

## 6. Roadway Characteristic Risk Analysis

A roadway characteristic risk analysis was performed using the following three sub-analysis:

- Crash Profile Risk Assessment
- usRAP Risk Assessment
- Local Street Risk Assessment

### 6.1. Crash Profile Risk Assessment

This risk assessment sub-analysis identifies common roadway characteristics for fatal and serious injury crashes that occurred within the WFRC study area. Based on the scoring of the various roadway characteristic risks identified from analysis of crash reports, a risk score was assigned to all state and federal aid routes within the East Weber County & Morgan County GFA consistent with the methodology described in Tech Memo #1 Section 3.4. The results of the Crash Profile Risk Assessment are mapped in the following figures:

- **Figure 6.1** – Crash Profile Risk Assessment Results (State Routes)
- **Figure 6.2** – Crash Profile Risk Assessment Results (Federal Aid Routes)

**Table 6.1** provides an overview of urban and rural segments with the highest risk scoring. Up to ten urban and rural segments are listed if the segment received at least 67% of the overall total risk score.

**Table 6.1 – WFRC Risk Segments (Federal Aid Routes)**

Area Type	Road Segment	Extents	Risk Score
Urban	3500 East	3600 North to 4100 North	22.5
Urban	5500 East	2200 North to 2300 North	21
Rural	Old Highway Road	600 West to SR-167	20.1 to 22.5
Rural	2200 North	SR-158 to 5500 East	21
Rural	2300 North	SR-158 to 5500 East	21

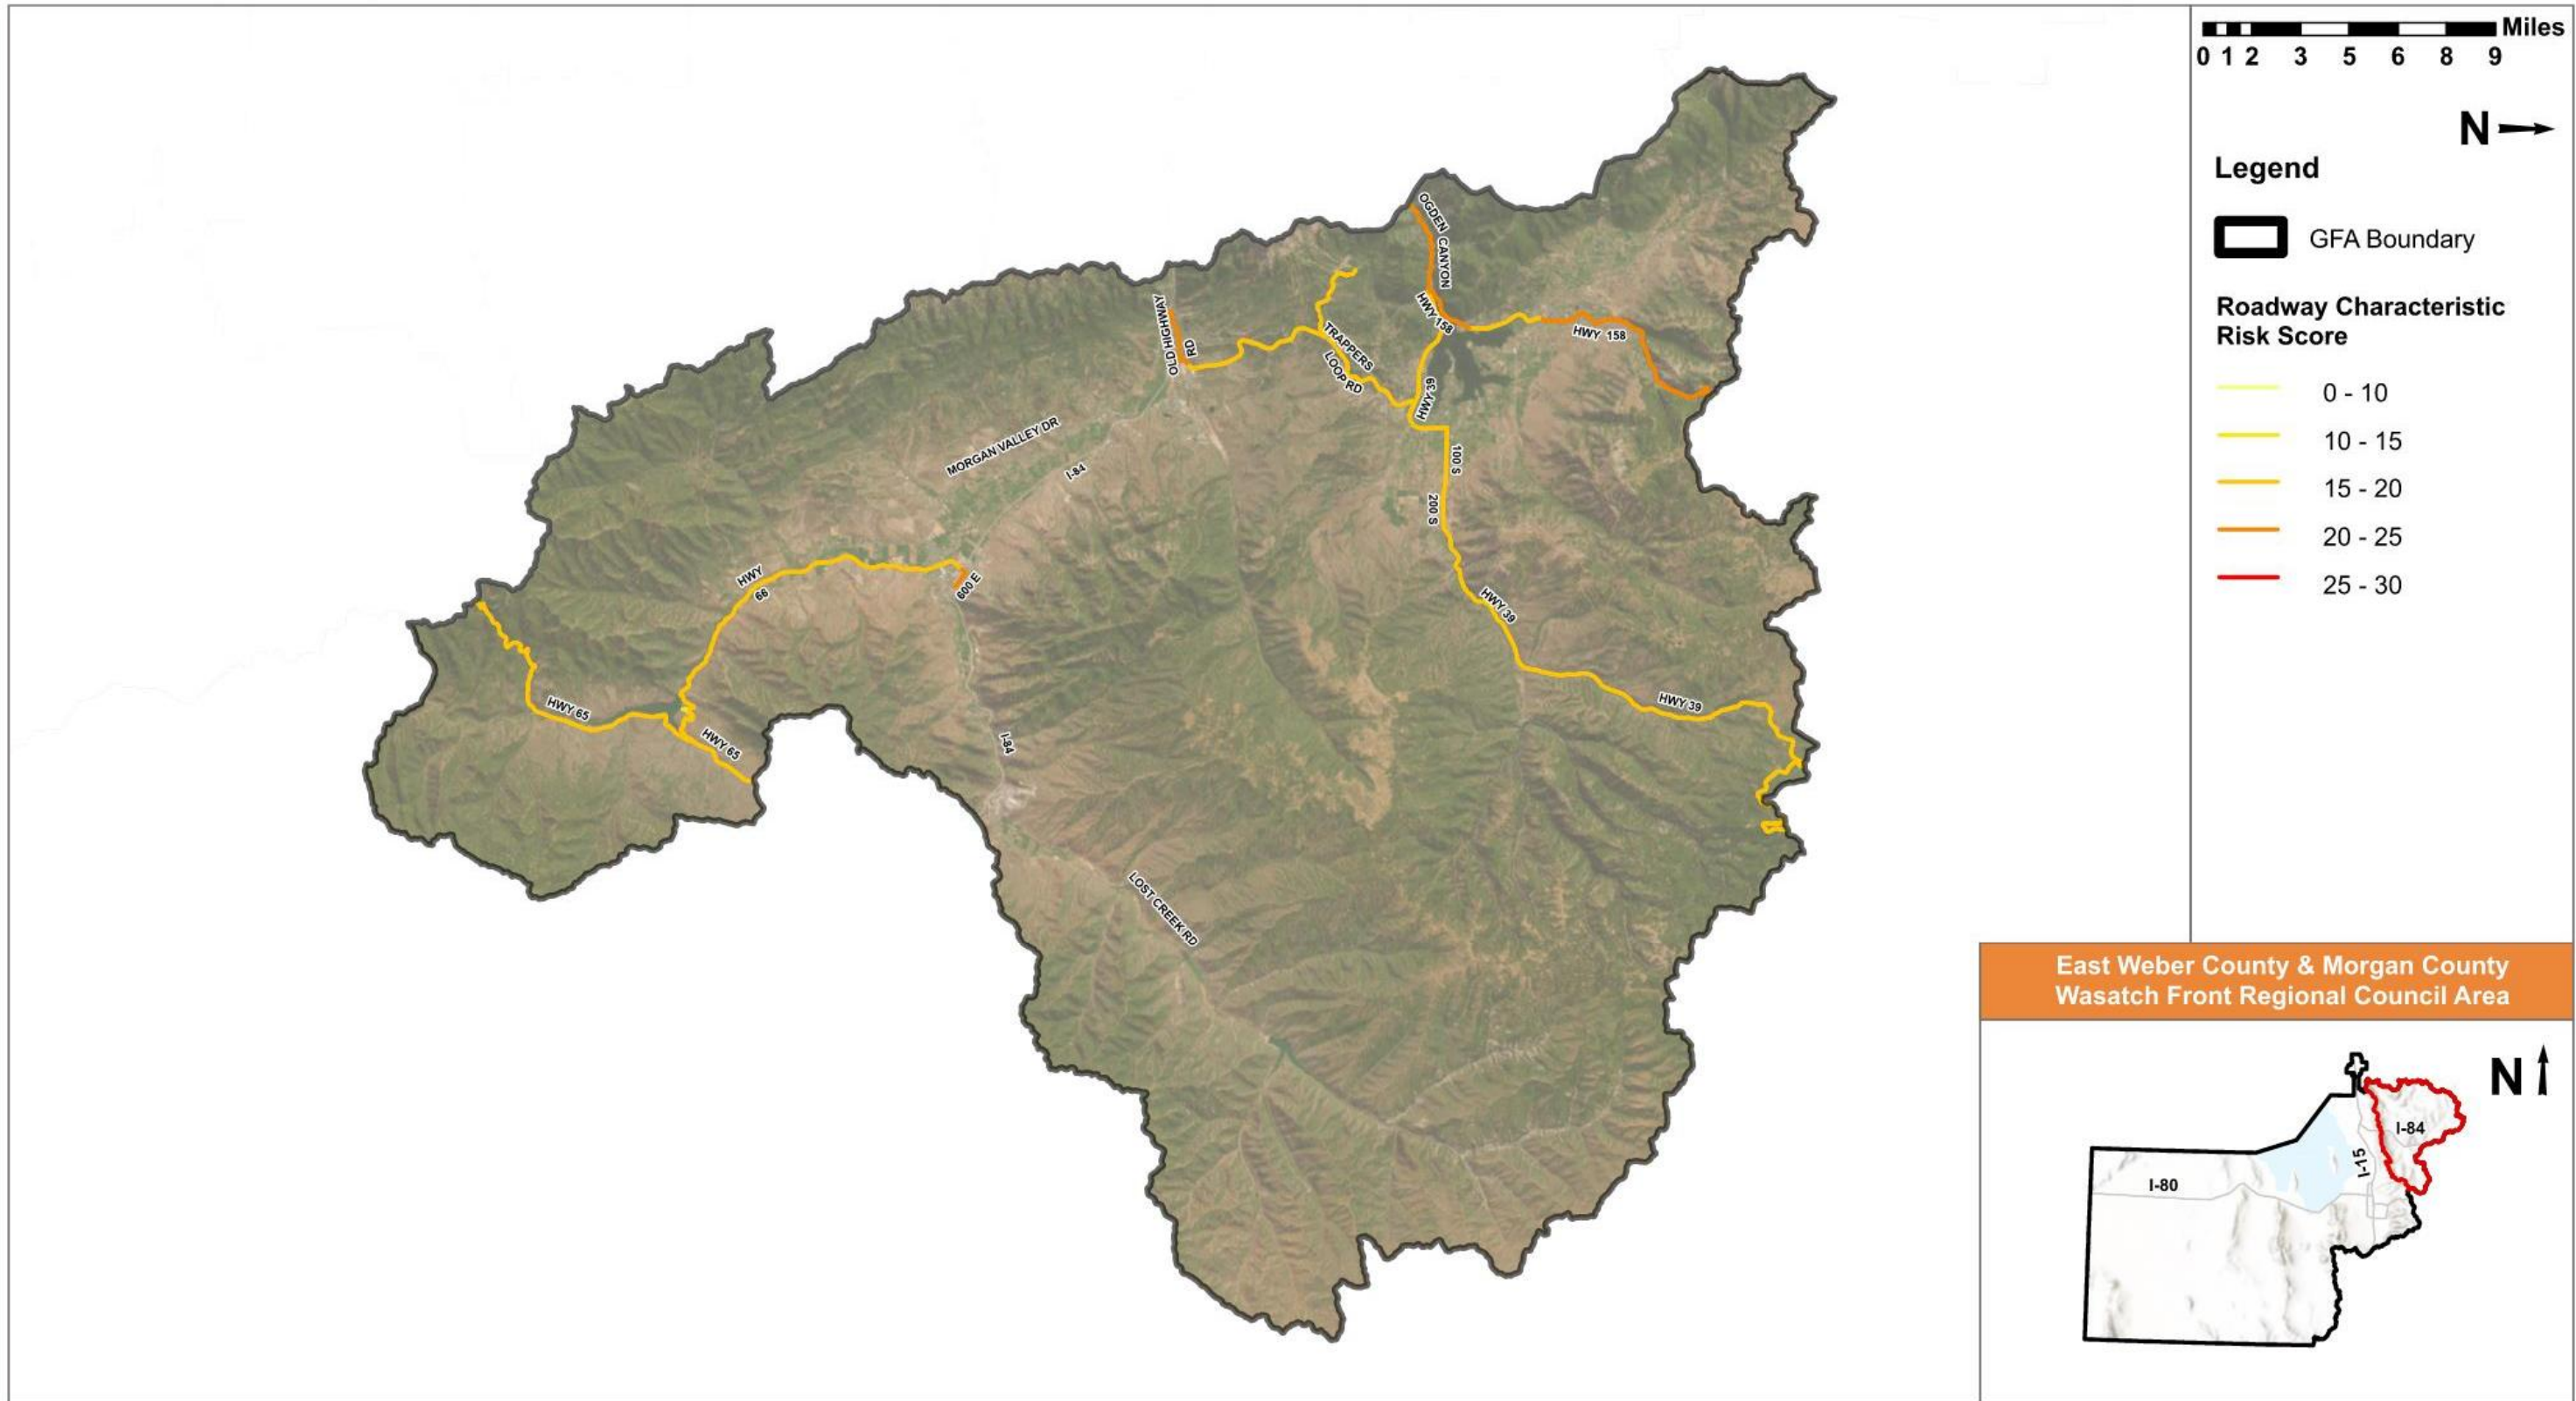

Figure 6.1 – Crash Profile Risk Assessment Results (State Routes)

Figure 6.2 – Crash Profile Risk Assessment Results (Federal Aid Routes)

## 6.2. usRAP Risk Assessment

A roadway characteristic risk assessment was performed using roadway feature data collected for Utah state and federal aid routes. The risk assessment was performed using the usRAP tool. The output of the usRAP tool is a star rating or risk rating for vehicle, pedestrian, and bicyclist features. The results of the usRAP risk assessment by star rating are mapped in the following figures:

- **Figure 6.3** – Vehicle Star Rating (State Routes)
- **Figure 6.4** – Vehicle Star Rating (Federal Aid Routes)
- **Figure 6.5** – Pedestrian Star Rating (State Routes)
- **Figure 6.6** – Pedestrian Star Rating (Federal Aid Routes)
- **Figure 6.7** – Bicycle Star Rating (State Routes)
- **Figure 6.8** – Bicycle Star Rating (Federal Aid Routes)

A summary of the highest risk segments (1-2 Stars) for federal aid routes in the East Weber County & Morgan County GFA are located in **Table 6.2**.

**Table 6.2 – usRAP Risk Segments (Federal Aid Route)**

Road Segment	Extents	Vehicle Risk	Pedestrian Risk	Bicycle Risk
Ant Flat Road	Ogden River Scenic Byway to North GFA Extents	X	X	X
2300 North	SR-158 to 5500 East	X	X	X
2200 North	5300 East to Sierra Drive	X	X	X
5500 East	2200 North to 2300 North		X	
3500 East	Highway 162 to 4100 North		X	X
Old Highway Road	SR-167 to Seago Lily Road		X	X
700 East	1900 North to Lost Creek Road		X	
Lost Creek Road	North of 700 East		X	
Morgan Valley Drive	SR-66 to Young Street		X	

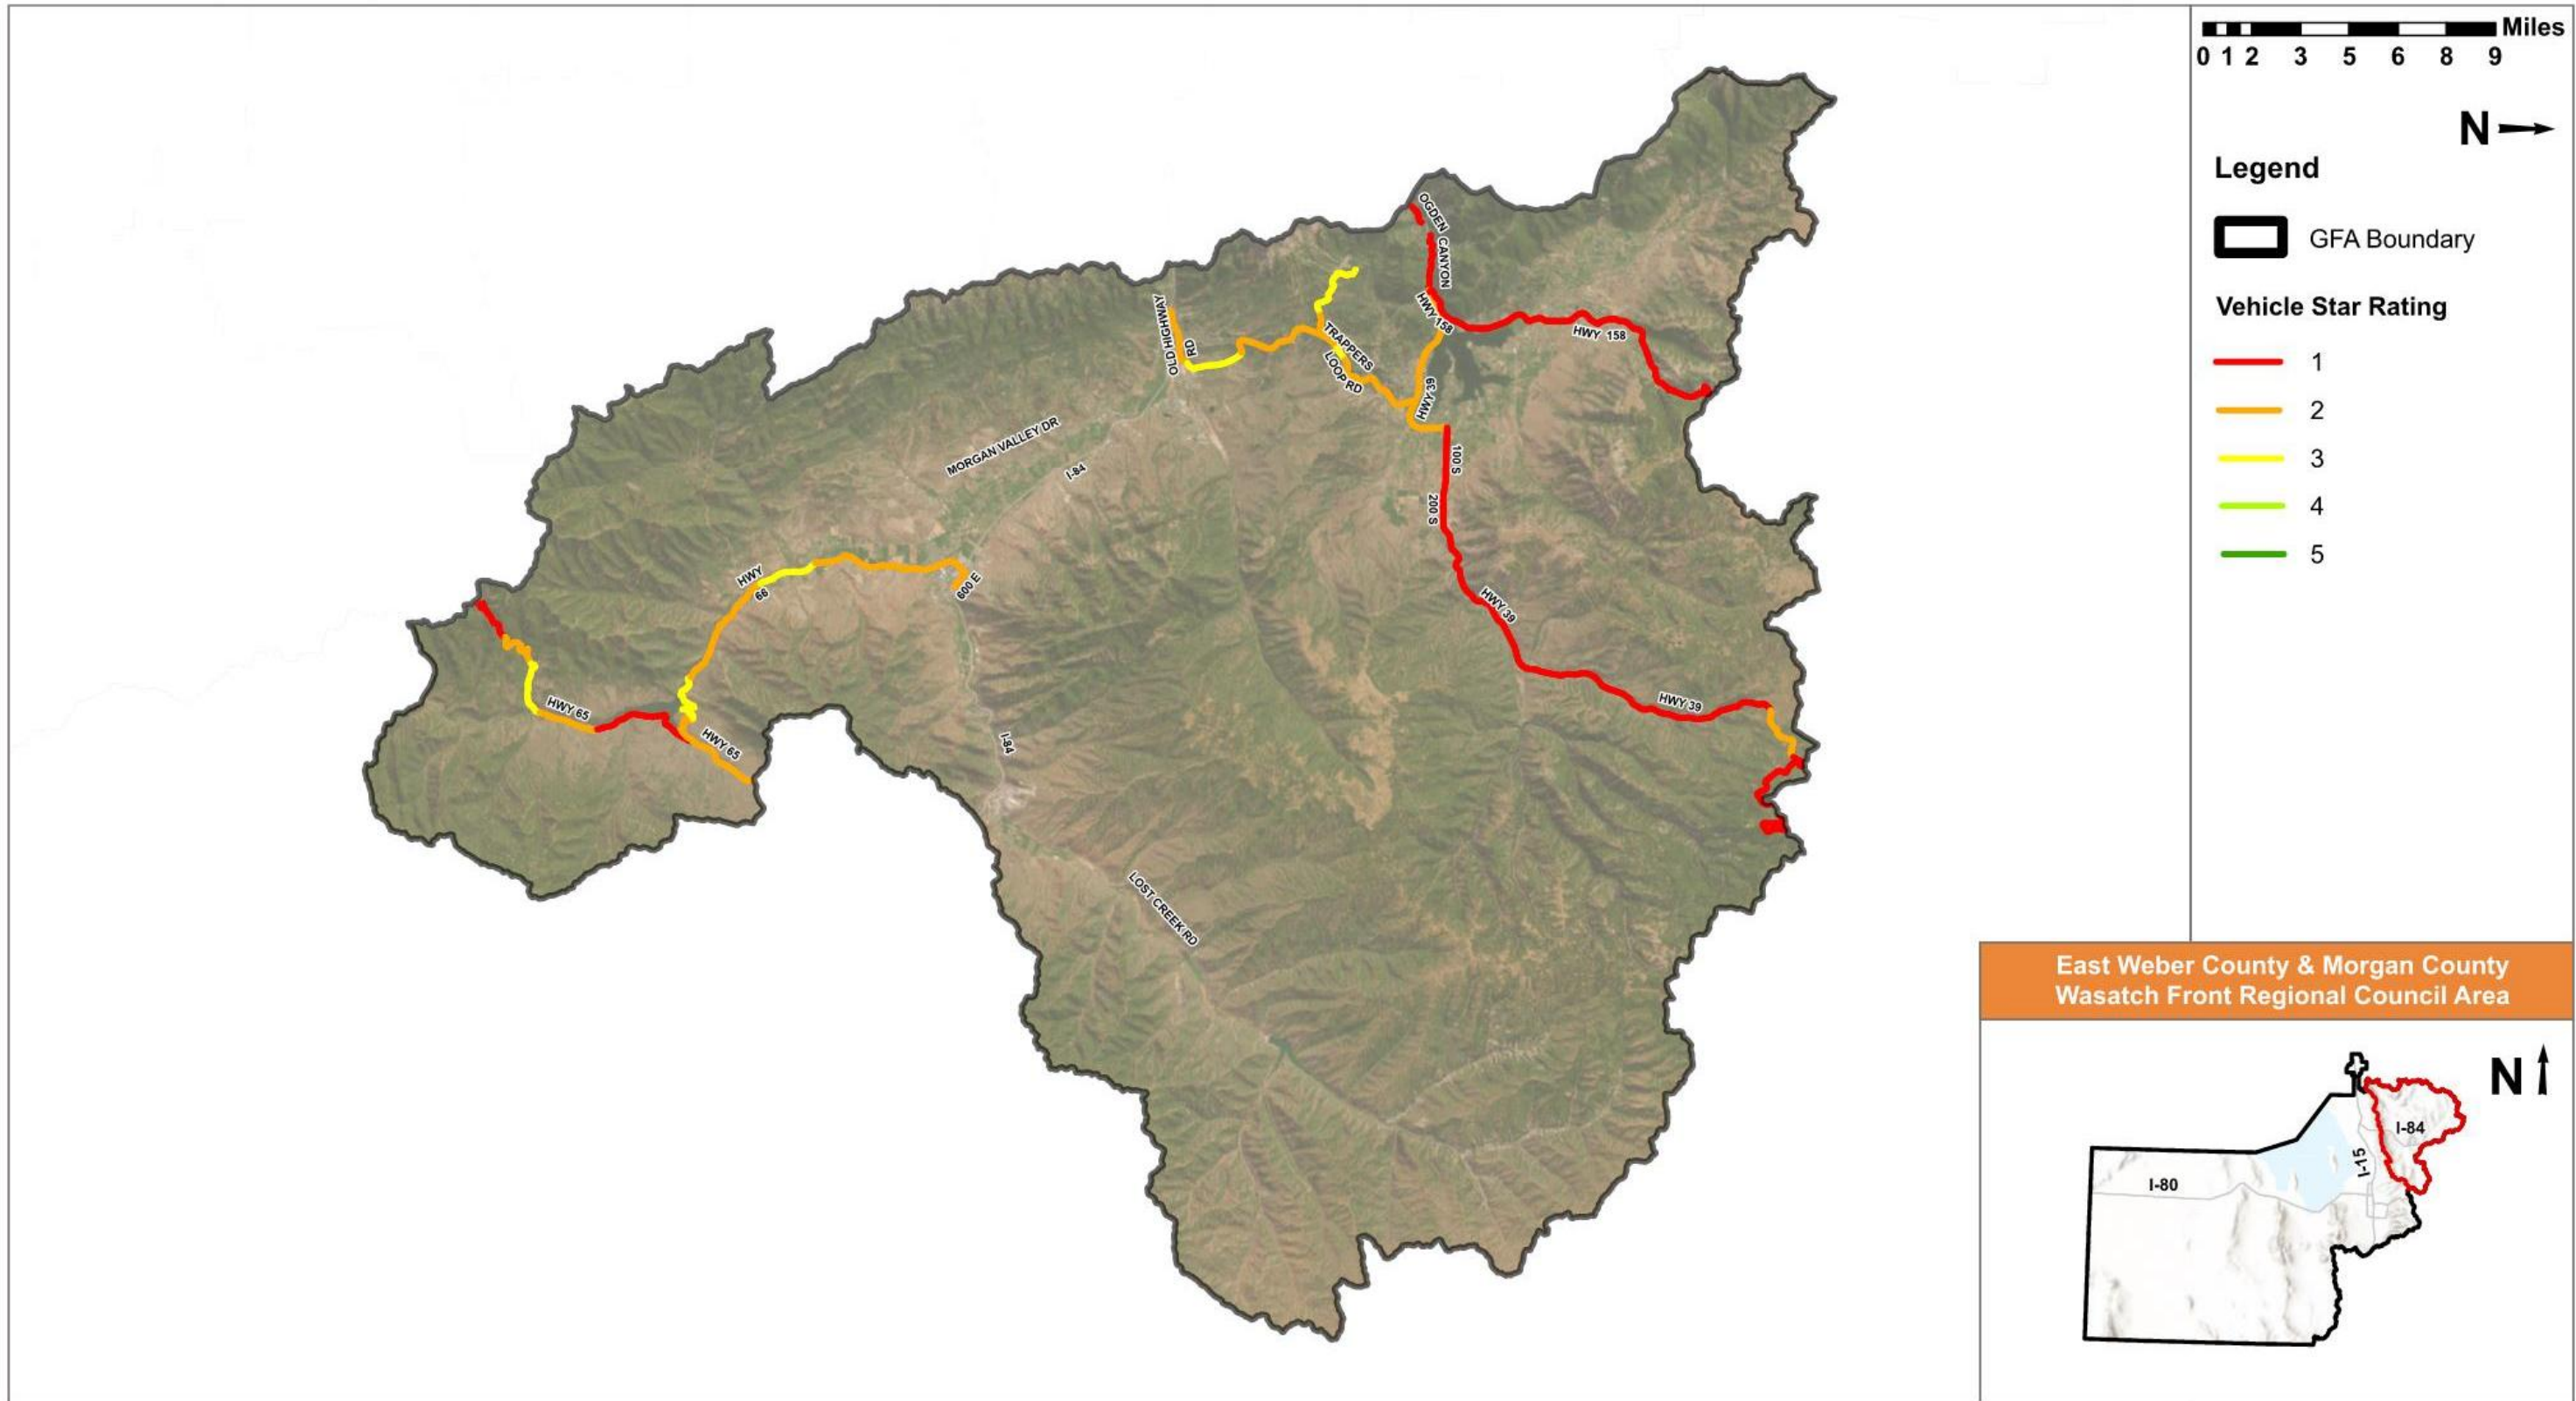

Figure 6.3 – Vehicle Star Rating (State Routes)

Figure 6.4 – Vehicle Star Rating (Federal Aid Routes)

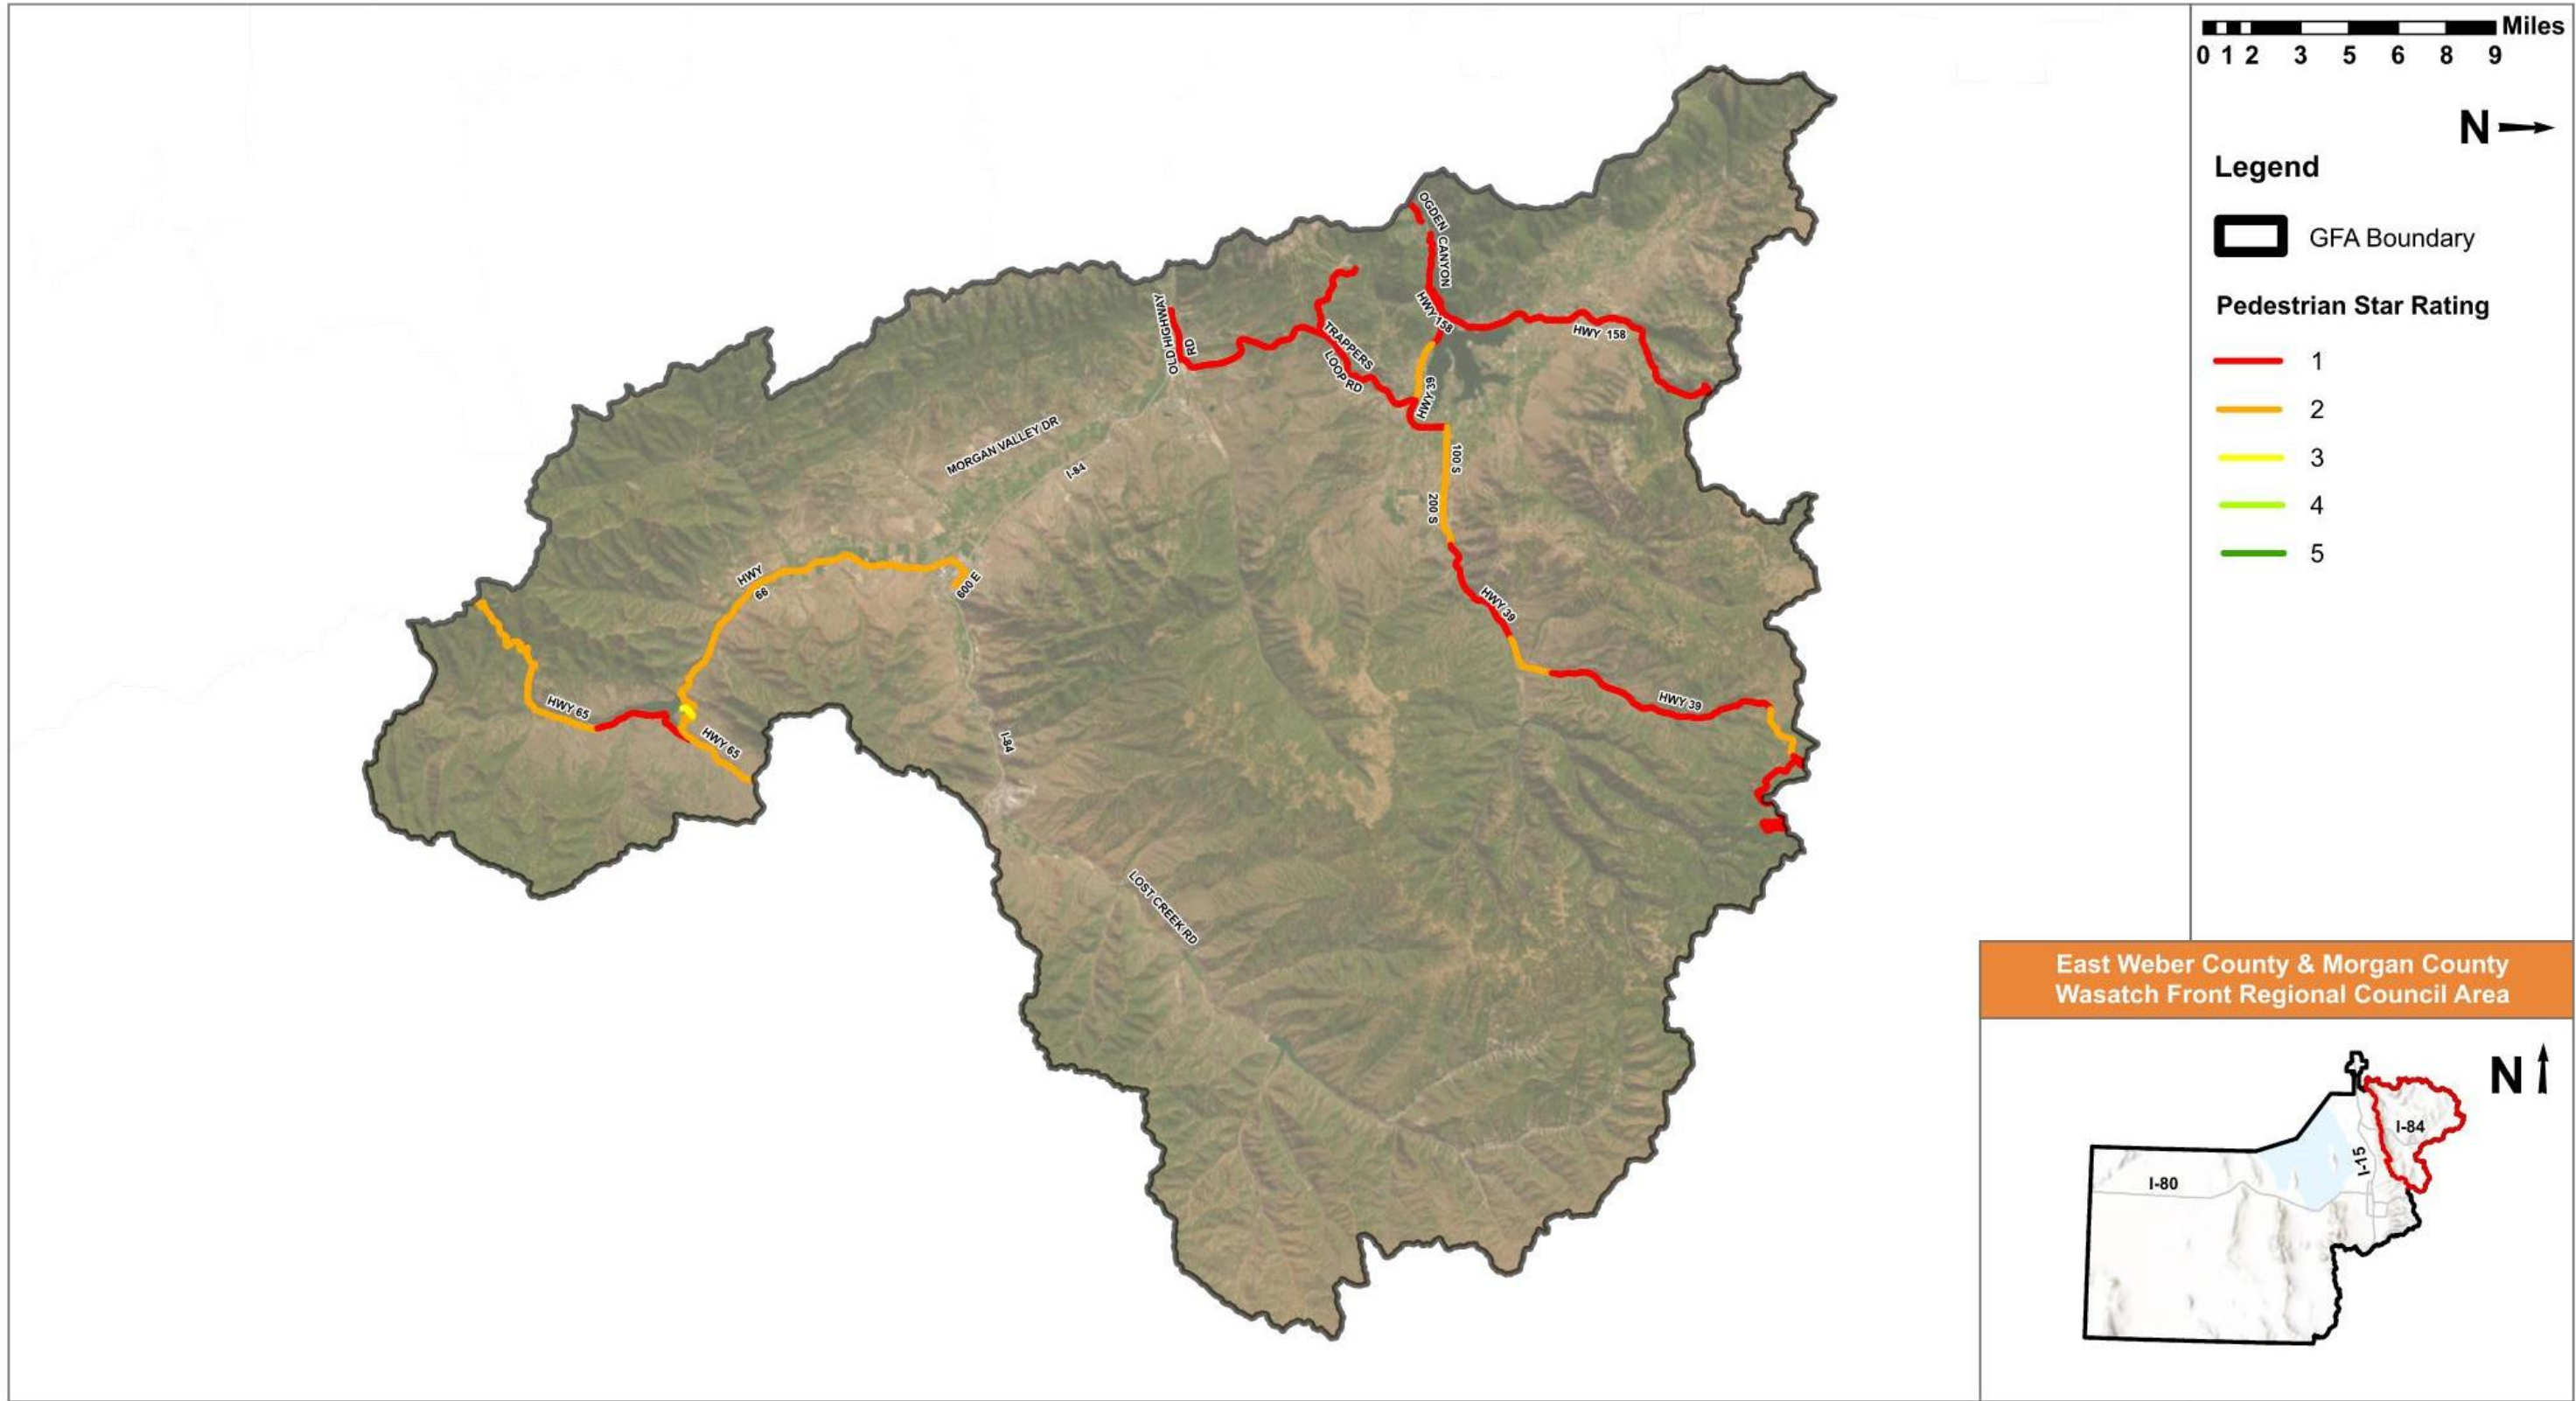

Figure 6.5 – Pedestrian Star Rating (State Routes)

Figure 6.6 – Pedestrian Star Rating (Federal Aid Routes)

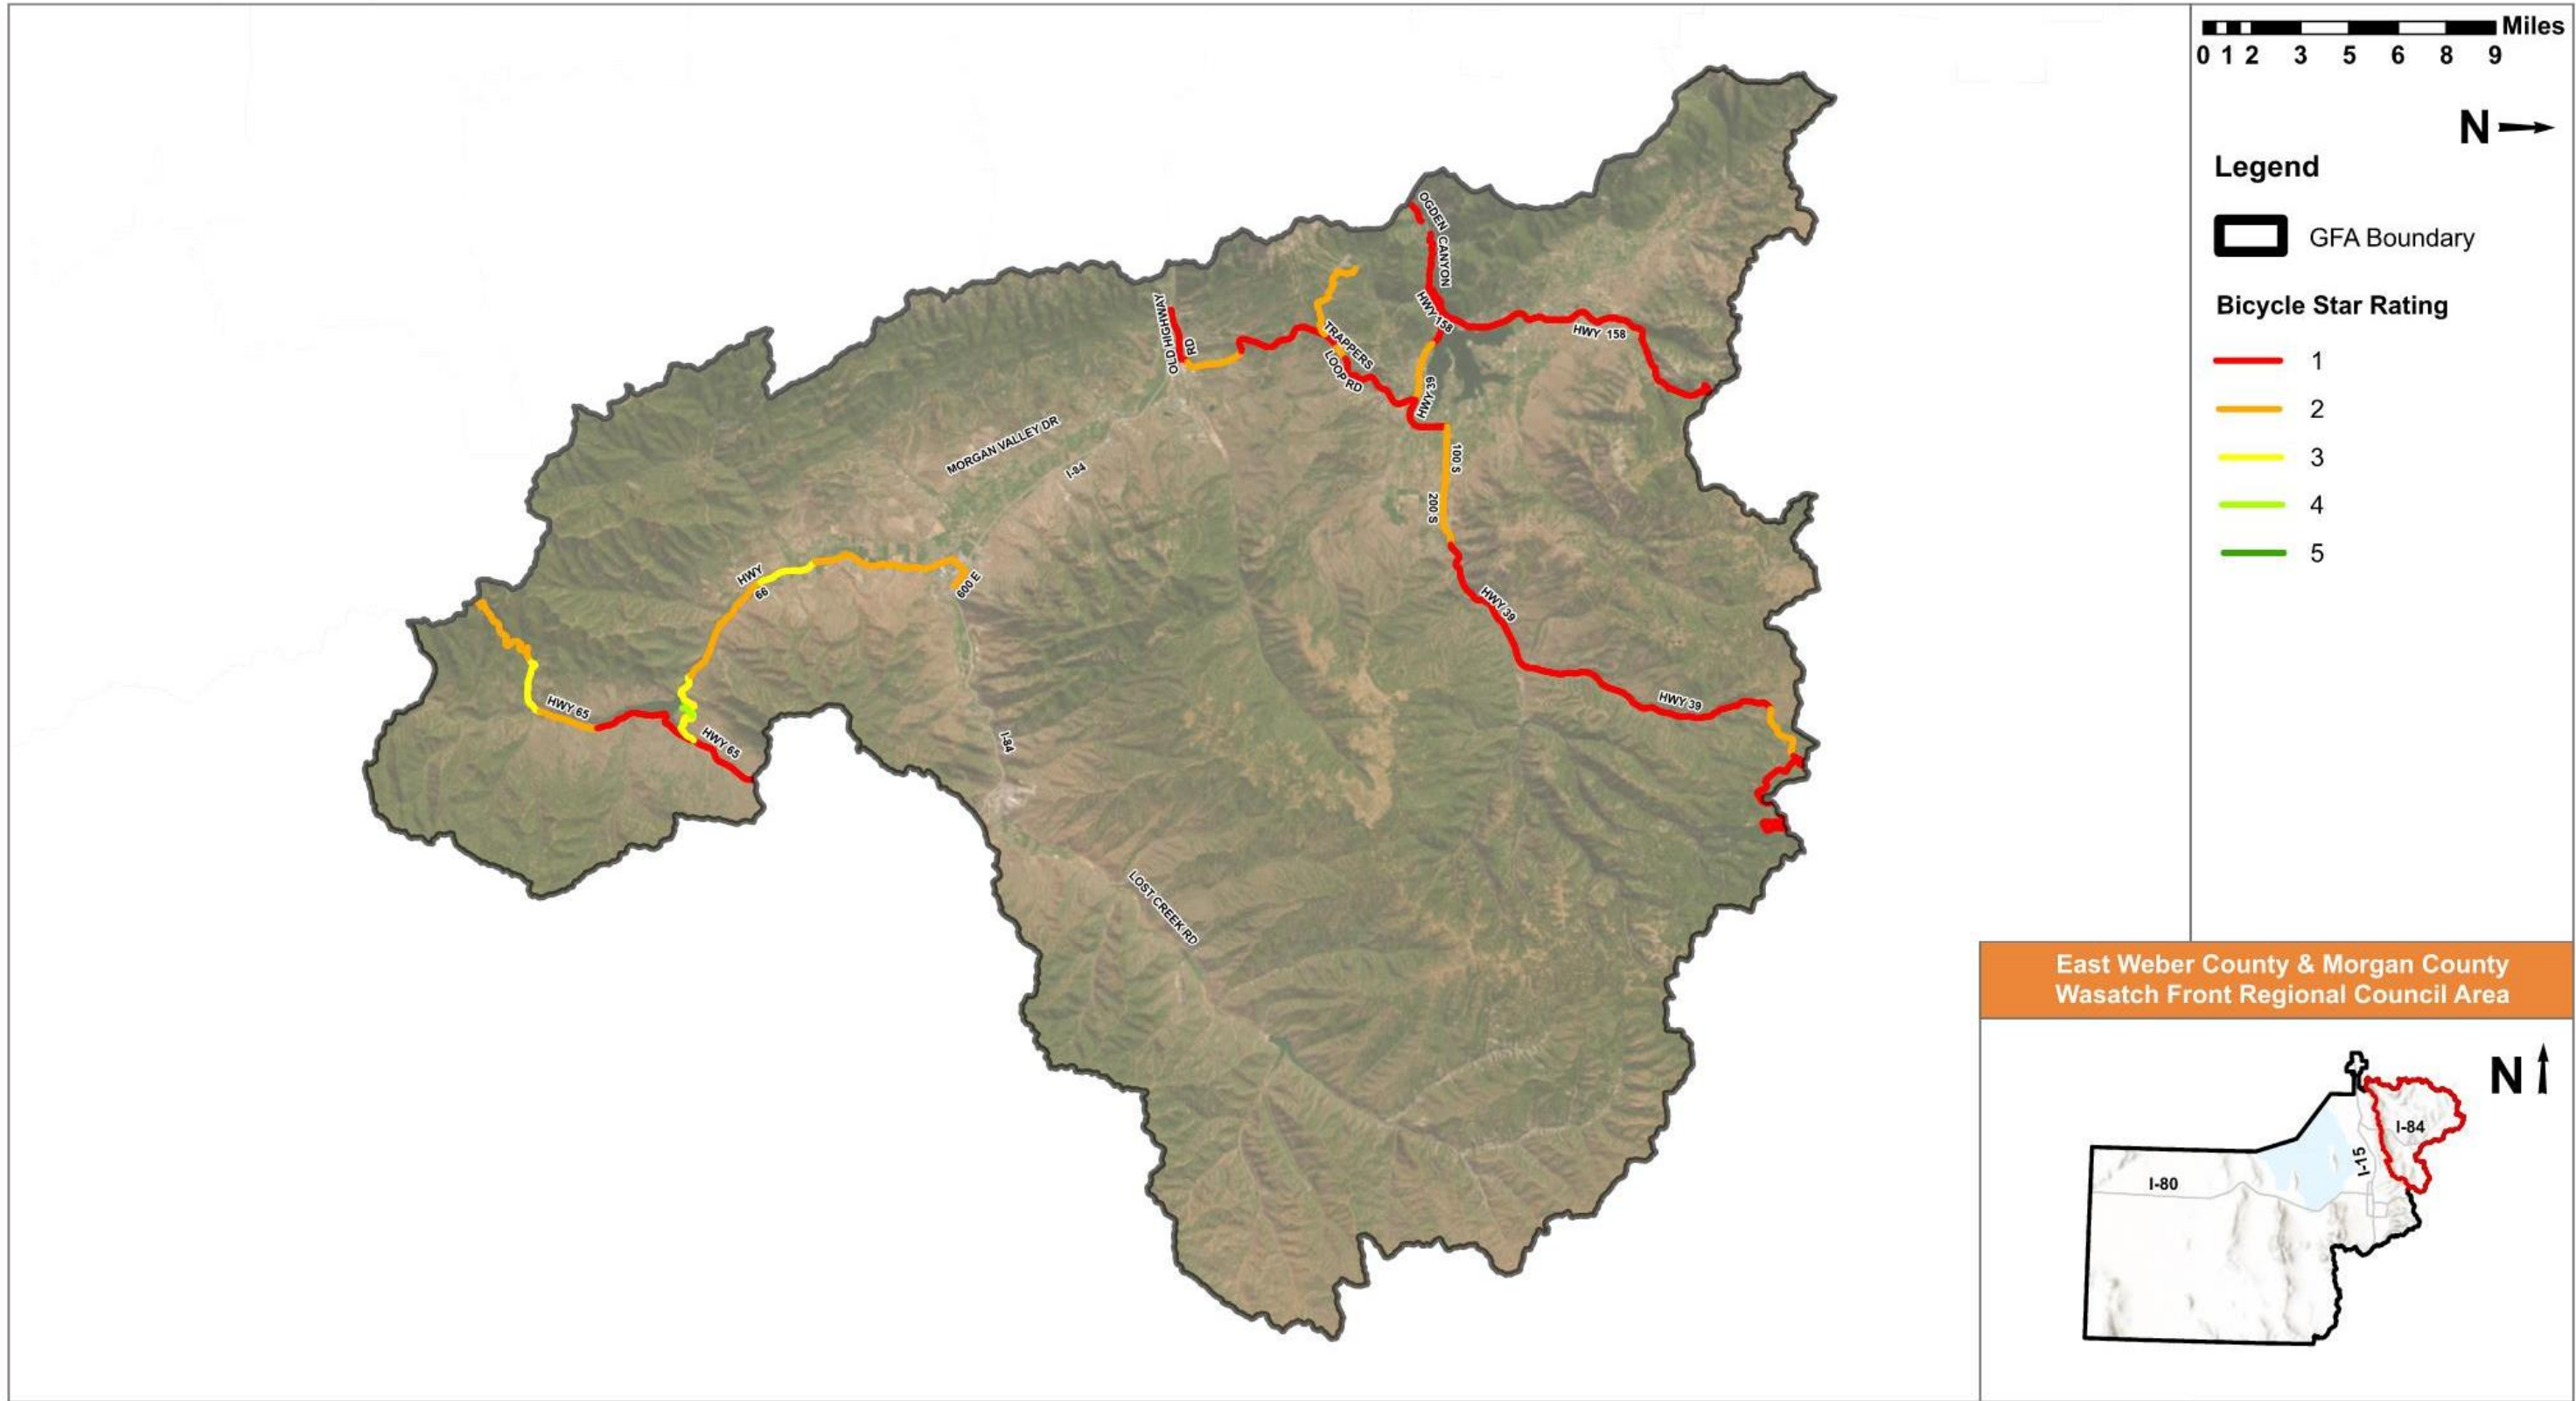

Figure 6.7 – Bicycle Star Rating (State Routes)

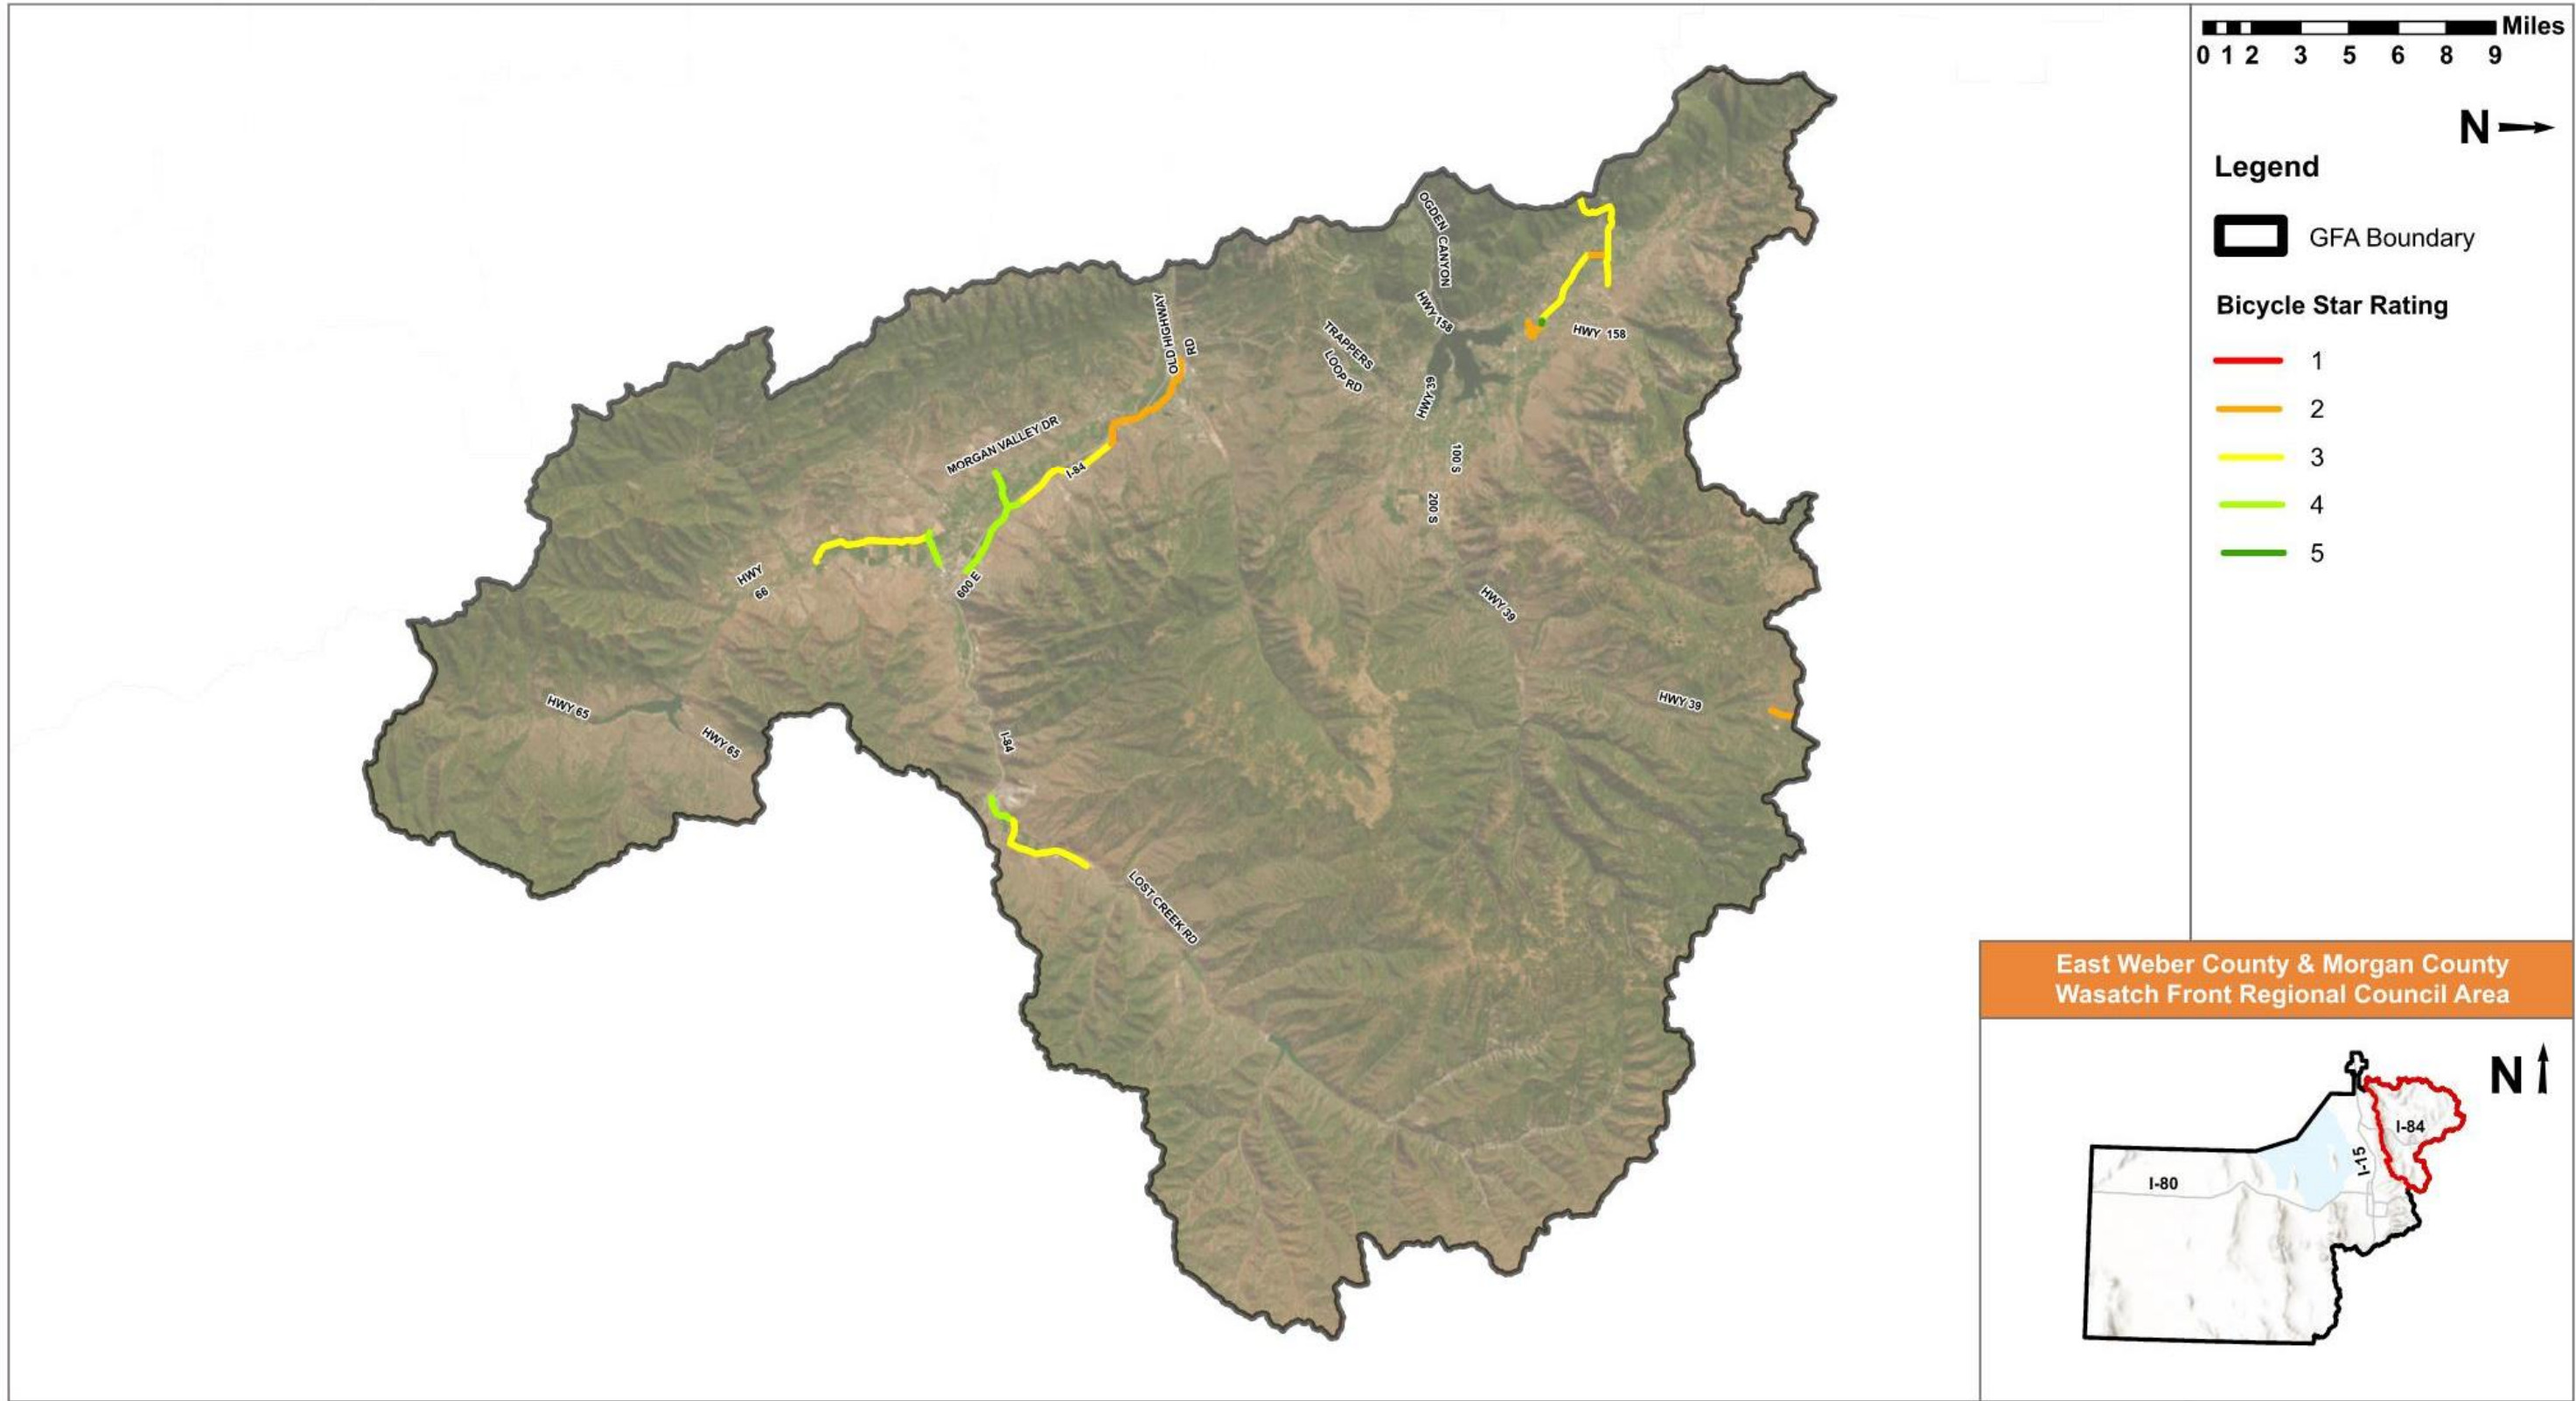

Figure 6.8 – Bicycle Star Rating (Federal Aid Routes)

### 6.3. Local Street Risk Assessment

A local street risk assessment was performed for all local roads within WFRC that are not included in the usRAP network. The results of the local street risk assessment are summarized in **Table 6.3** and **Figure 6.9**. Mapped segments include the top 5% risk segments within the WFRC study area and the top 10 segments or high priority segments within the East Weber County & Morgan County GFA.

**Table 6.3 – Local Street High Priority Segments**

Road Segment	Extents
Richville Lane	Morgan Valley Drive – SR-66
North Fork Road	Middle Gate Drive – North Fork Park Road
Lost Creek Road	-
Old Highway Road	2000 North – 2700 North
100 North	200 East – 300 West
100 South	100 West – 400 East
525 North	-
5900 East	2100 North – 1800 North
River Drive	Hwy-162 – 4100 North
Round Valley Road	-

Figure 6.9 – Local Street Risk Assessment Results

## 7. Safety Analysis Summary

This section summarizes the safety analysis performed for the East Weber County & Morgan County GFA by identifying common risk characteristics and a composite high-risk roadway network.

### 7.1. Common Risk Characteristics

Based on the SHSP Emphasis Area Analysis and the Historical Crash Analysis summarized above, the following are common risk characteristics that should be considered when developing safety improvement projects specific to the East Weber County & Morgan County GFA:

- Roadway Departure
  - 63.7% of all fatal and serious injuries
  - 60.9% of all fatal and serious injury crashes
- Motorcycle
  - 41.2% of all fatal and serious injuries
- Speed-Related
  - 33.3% of all fatal and serious injuries
- No Safety Restraints
  - 22.5% of all fatal and serious injuries
- Teen Driver
  - 14.7% of all fatal and serious injuries
- Active Transportation
  - 1.1% of all fatal and serious injuries
- Left Turn at Intersection
  - 4.6% of all fatal and serious injury crashes

### 7.2. Composite High-Risk Roadway Network

Each of the safety analysis methodologies completed identified segments that can be improved to reduce fatalities and serious injuries.

To identify an overall high-risk roadway network and provide focused information for jurisdictional decisions regarding prioritization of safety improvements, an analysis was performed to identify overlapping segments from each of the analysis methodologies. A composite score, from zero to five, was determined using the approach in **Table 7.1**. The high-risk roadway network is a composite of the various risks as presented in **Section 4** through **Section 6** of Tech Memo #1. The top 10% of roadway segments for the entire WFRC area are included in the Composite High-Risk Network. These segments have a composite risk value of four or higher.

The East Weber County & Morgan County GFA Composite High-Risk Network for Federal Aid routes is summarized in **Table 7.2**.

The results are also mapped in **Figure 7.1** (State Routes) and **Figure 7.2** (Federal Aid Routes).

**Table 7.1 – Composite High-Risk Roadway**

Analysis	Risk Type	Approach	Value
Historical Crash Analysis	Historical Crash Risk	5-Year Crash Totals ≥ 3 Crashes	1
Crash and Network Screening Analysis	Systemic Crash Risk	Positive Local CCR Differential	1
WFRC Risk Assessment	Roadway Risk	Risk Score ≥ 20	1
usRAP Risk Assessment	Vehicle Risk	Vehicle Star Rating = 1-2 Stars	1
usRAP Risk Assessment	Pedestrian Risk	Pedestrian Star Rating = 1-2 Stars	0.5
usRAP Risk Assessment	Bicycle Risk	Bicycle Star Rating = 1-2 Stars	0.5
<b>Total Possible Composite Risk Score</b>			<b>5</b>

The greater the overlap the higher the likelihood that the segment has risk factors that should be addressed to reduce and/or eliminate fatal and serious injury crashes at that location. The top 10% of roadway segments for the entire WFRC area are considered high-risk segments. These segments have a composite risk value of four or higher. A summary of the composite high-risk roadway network for federal aid routes is summarized in **Table 7.2**. The results are also mapped in **Figure 7.1** and **Figure 7.2**.

**Table 7.2 – East Weber County & Morgan County High-Risk Roadway Network (Federal Aid Routes)**

Facility	Limits	Functional Classification	City	Composite Risk Score	Length (miles)	usRAP- Pedestrian Star Rating	usRAP - Bicycle Star Rating	usRAP- Vehicle Star Rating	Crash Profile Risk Score	CCR Differential Analysis	Significant Crashes
Federal Aid Routes											
Old Highway Rd	Morgan Valley Dr to Bohman Ln	Major Collector		4	0.1	X	X		X	X	X

**EASTERN WEBER COUNTY & MORGAN  
COUNTY CASE STUDY PROJECT  
INFORMATION SHEETS**

### Project Description/How is safety improved?

This project is focused on systemic corridor safety improvement in an effort to reduce run-off-road, head-on, and rural roadway crashes. Countermeasures include shoulder installation and widening, edge and centerline rumble strips, wider edge lines, Safety Edge installation, and enhanced curve warning signs. Due to the difficult nature of construction on the northern end of the project, additional quantity was added to shoulder widening to account for anticipated increased costs. Additional evaluation of the SR 162 and SR 158 stop-controlled intersection is included.

*This project description represents potential safety improvement strategies that could be implemented at this location, as well as other locations with similar conditions. Additional improvement strategies could be considered subject to engineering analysis.*

### Proposed Proven Safety Countermeasures

Longitudinal Rumble Strips and Stripes on Two-Lane Roads

Enhanced Delineation for Horizontal Curves

Wider Edge Lines

SafetyEdge™

### Opinion of Probable Construction Cost

#### Segment Improvements

Item Description	CMF	Applicable Crashes	Quantity	Unit	Unit Price	Item Cost
Provide 2-Ft Paved Shoulder on Rural 2-Lane Roadways	0.66 - 0.89	All Crashes	8.68	MILE	\$ 298,000	\$ 2,585,895
Shoulder Widening on Rural Roads	0.771	All Crashes	8.68	MILE	\$ 32,000	\$ 277,680
Install Safety Edge with Repaving Projects	0.79 - 0.892	All Crashes	11.57	MILE	\$ 121,000	\$ 1,399,970
Install 6" Edge line (Both Sides of Road)	0.64 - 0.88	All Crashes	11.57	MILE	\$ 7,000	\$ 80,990
Install and/or Upgrade Curve Signage to Enhanced Delineations	0.4 - 0.852	All Crashes	7.00	CURVE	\$ 2,000	\$ 14,000
Install Edge line Rumble Strips	0.49 - 0.87	Fatal & Injury	11.57	MILE	\$ 9,000	\$ 104,130
Install Centerline Rumble Strips	0.36 - 0.56	Head-on Fatal & Injur	5.79	MILE	\$ 5,000	\$ 28,925

Improvements Subtotal:	\$ 4,716,590
Mobilization: (% +/-)*	10% \$ 75,000
Traffic Control: (% +/-)	5% \$ 235,830
Items Not Estimated / Contingency: (% +/-)	30% \$ 1,414,977
Estimated Construction Cost:	\$ 6,442,397

Local Match<sup>†</sup>: 20% \$ 1,636,400

<sup>†</sup> Toward SS4A Implementation Grants

Preconstruction Engineering/Design	12%	\$ 773,088
Utilities**		\$ -
ROW**		\$ -
Construction Engineering/Management	15%	\$ 966,359
<b>Estimated Project Total:</b>		<b>\$ 8,182,000</b>

\*Mobilization is 10% +/- of the subtotal with a minimum of \$2,500 and a maximum of \$75,000

\*\*To be evaluated during feasibility study/design

#### Additional Potential Improvements

Additional safety improvements could be considered that were not included due to availability of data, need for site-specific information, and/or agency/jurisdiction input. Potential additional countermeasures are listed below. Refer to the **Countermeasure Toolbox** for a complete list of safety countermeasures.

- Additional Improvements #1: Set Appropriate Speed Limits for All Road Users
- Additional Improvements #2: Evaluate signalization at warranted intersections
- Additional Improvements #3: Improve Roadside Design on Curves
- Additional Improvements #4: \_\_\_\_\_
- Additional Improvements #5: \_\_\_\_\_

#### Disclaimer:

Disclaimer: The cost estimates provided in this document are for comparison purposes only. Actual project costs will vary. The recommended safety improvement strategies were based on available data and reasonable engineering judgment and a more detailed assessment may suggest additional safety strategies that could be considered.
